#construmat23    

# Building sustainability

# Towards a sustainable future

The construction sector is **essential** when it comes to addressing and overcoming the urgent challenges facing social, economic and environmental development.

It's **capacity to have an impact on all areas of human activity** (housing, health, education, trade, industry, infrastructures, landscape planning, etc.) gives it an **undeniably prominent role.**

# This is the right time to return to Construmat

The value of a major brand

**CONSTRUMAT**  
Volvemos a construir juntos

# Part of the ADN sector's

We've been **the flagship fair in Spain on 40 occasions**. This track record has made us a globally renowned brand for our **commitment to innovation, sustainability and business**.

We've supported the sector since the outset in both the good and the difficult times. In 2023 we'll be closer to the companies than ever before, putting **a high-profile media event** at their service.

Sign up for Construmat and **associate your company with the values of our brand**.

This is the right time to move forward again.

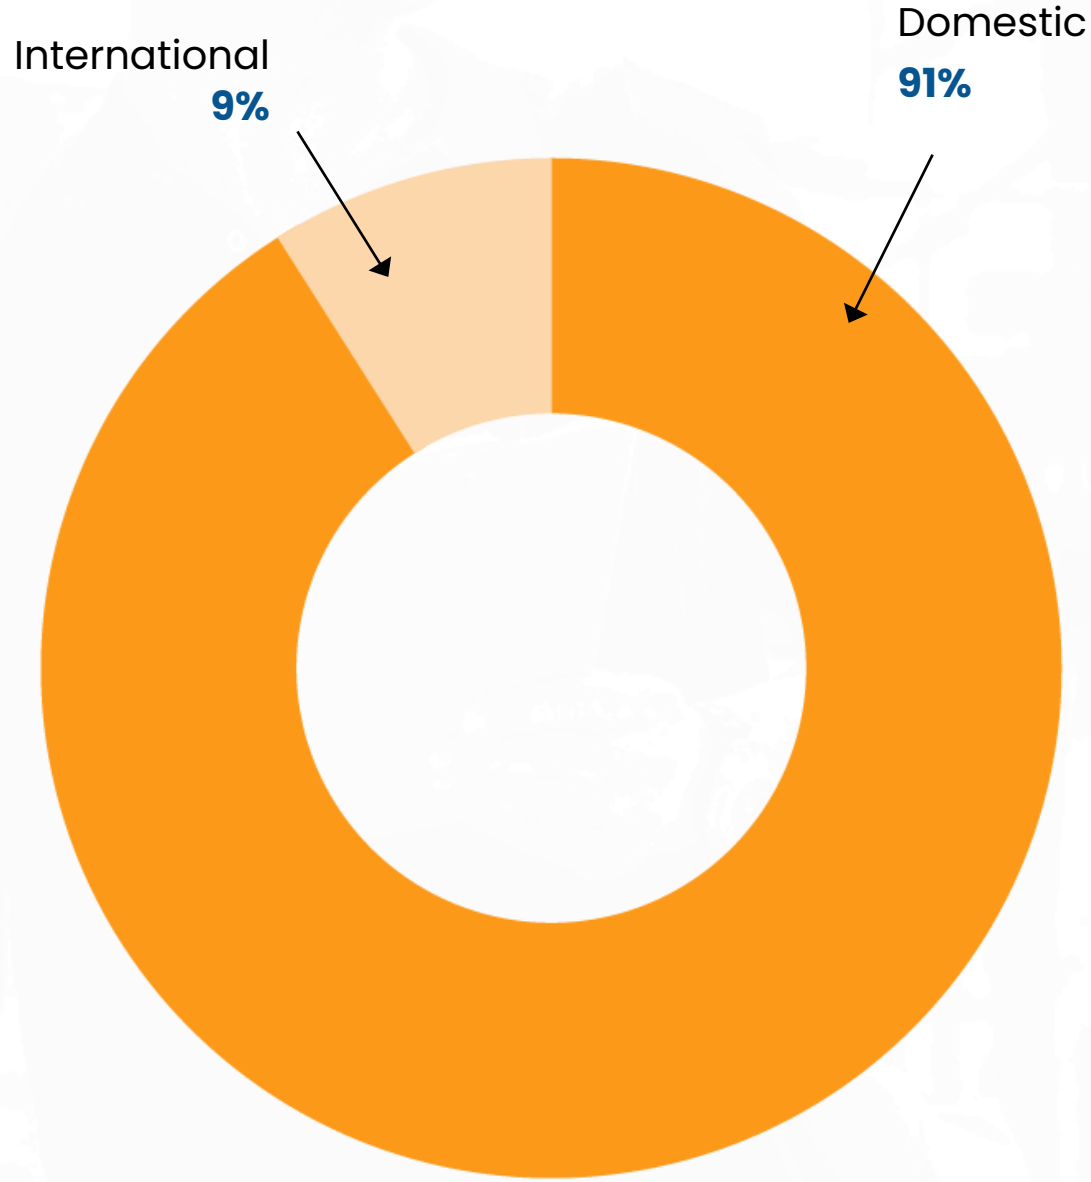

# We'll introduce you to your future customer

Position yourself in front of over 15,000 visitors and connect with VIP buyers.

# Professionals who purchase and decide

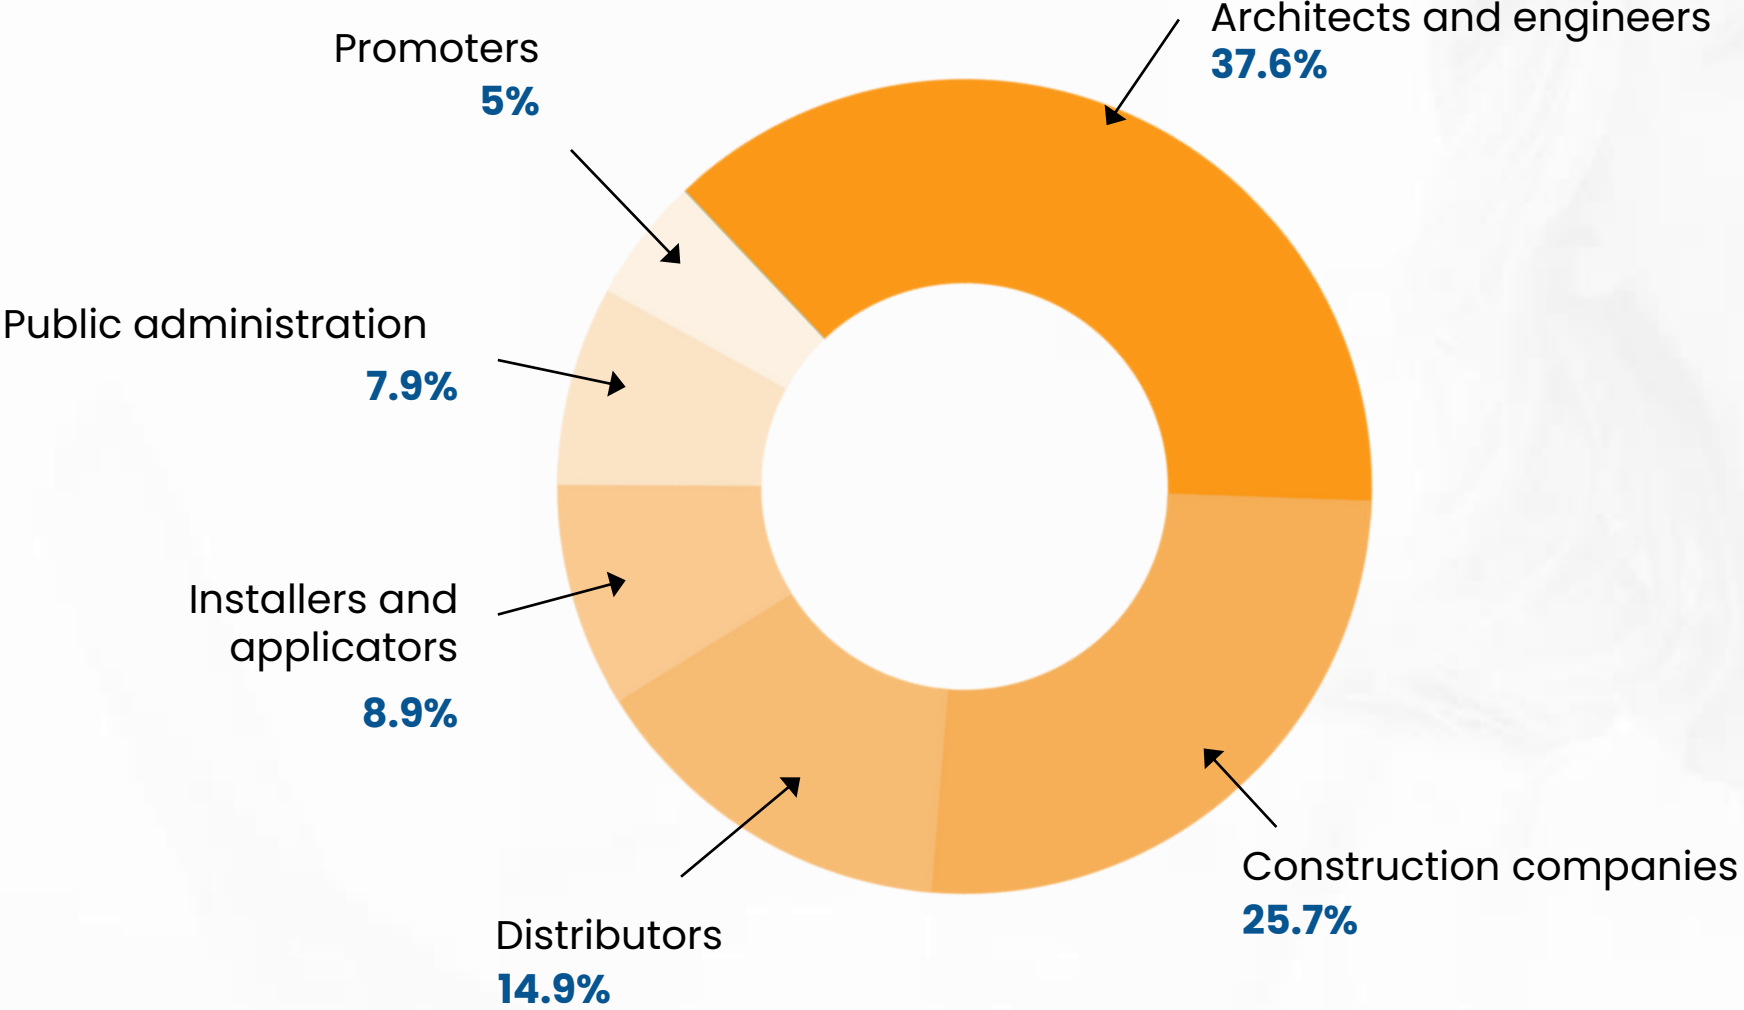

Architects, engineers, builders, distributors, fitters, applicators, promoters... We know that they decide. This is why we've nurtured our relationship and they **reward us with their loyalty, year after year.**

**TANGIBLE PROJECTS**

# Congress

We focus on **real projects and initiatives** (innovation put into practice in the field) **that best visualise the transformational nature of the sector and its positive impact on the environment.**

## Industrialisation

Solutions through mechanisation and automation, applying advanced manufacturing methodologies and systems to the production and project development needs of the construction sector.

## Sustainability

Innovative projects in the efficient use of raw materials, recovery and reuse systems, the preservation of rare elements and critical raw materials and the minimisation of the construction industry's environmental impact.

## Digitisation

Successful experiences in the construction sector that have brought about changes and transformations through the integration and use of technologies in their processes, such as BIM systems and the use of Big Data or IoT.

SEEING, HEARING, TOUCHING

## Training classroom

An open space for technical seminars, demonstrations and applications, training and examples of rehabilitation.

A CHALLENGE TO TALENT

## TOP 3 Construmat

An acknowledgement of talent and commitment to innovation and sustainability in the sector.

LIVE PROJECTS

## Timber construction area.

A wooden house will be built under sustainability criteria throughout the fair.

**CONSTRUMAT 2023** will be a unique showroom, an innovative and dynamic space where construction professionals will find the latest materials, techniques and services to build a more sustainable and efficient future starting at this very moment.

CONSTRUMAT 2023

# A not-to-be-missed event

 **CONSTRUMAT** | Building sustainability

effective

## Relevance

The sector is one of the main drivers of the economy and offers solutions to the challenges facing society.

## Business potential

With an expected 15,000 visitors, the companies you're looking for and the profiles you're interested in will attend our event.

## Committing to the future, today

Tomorrow is written today. What's the innovation on the market that we can apply? Which one gets the best results?

## Values

Innovation, sustainability and efficiency are our assets, make them yours too.

## Publication

Take part in Spain's largest showcase and promote your brand to a cumulative audience of 212 million people and advertising totalling 1.7 million euros.
