

PROGRAM 2014

UPDATE 30/10/14

CHANGE THE WORLD

Join the Smart Community

www.smartcityexpo.com

#smartcityexpo

Changing Mindsets Smart Cities are as much about the **new urban technologies** that help manage cities more efficiently as about changing people's and institutions' frameworks and the processes that make cities work better. **Smart City Expo World Congress (SCEWC)** aims to define what smart cities are, what their challenges include and investigate which solutions and responses are most relevant while always keeping society and the public at the center of the debate.

Smart cities start here The **Smart City Expo World Congress** is an event that has become the industry leader in smart cities. Its position as the benchmark in its sector gives it enormous convening power. SCEWC 2013 gathered in Barcelona more than **9,000 visitors, 160 companies, 300 cities represented and 3,055 delegates** from countries around the world. The World Congress will introduce, debate, and share pioneering ideas and approaches from the most highlighted speakers. The SCEWC is a meeting point for companies, government, entrepreneurs and research centers to show, learn, share, network and gather inspiration to support the development of the cities of the future.

Congress The congress program of the **SCEWC is composed of 5 keynotes, 6 plenary sessions and 42 breakout sessions.** Our keynotes are top leaders from either the academic research world or authors with the most interesting inside views on how the world has developed and how the future will unfold for smart cities. Plenary Sessions are discussion panels focusing on long term policies and strategic analysis and visions, and parallel sessions are structured generally as presentations panels, and they have a more specific focus on projects, solutions or case studies.

Where cities meet cities The **SCEWC** is the meeting point for cities around the world. Cities come together to tackle the challenges and share visions and solutions towards becoming a more livable and sustainable. Cities participate in the **Exhibition Area** by showcasing their projects and promoting their local companies with solutions ready to be implemented.

Where companies make business The **SCEWC** is the best marketplace for companies to make business: join leaders, experts and major market decision-makers; showcase your products, technologies and solutions; interact and enhance your visibility; find the tools and activities you need to succeed; share knowledge and find new partnership opportunities.

Smart City Plaza Real-time, real-world solutions - 2,000 m² to display and experience the new products that are spearheading change.

An integrated vision of all interacting areas in the development of innovative and sustainable cities.

SMART CITIES, CHANGE THE WORLD AND KEYNOTE SPEAKER

Pag. 4

Green, choice, efficiency, climate change, storage and energy infrastructure, zero carbon.

SMART SOCIETY

Pag. 5-10

Empower, engage, apps, citizen services, social innovation, apps for society, social well-being.

ENERGY

Pag. 11-14

Green, choice, efficiency, climate change, storage and energy infrastructure, zero carbon.

TECHNOLOGY

Pag. 15-20

Integration, connect, data, services integration, Internet of things, cloud, apps.

MOBILITY

Pag. 21-24

Share, integrate, decarbonize, intelligent transport systems, public transportation.

SUSTAINABLE CITY

Pag. 25-30

Resilience, regenerate, transform, water & waste management, security.

GOVERNANCE

Pag. 31-37

Open, collaborate, development, entrepreneurship.

SPEAKERS

Pag. 38-65

SESSION PROGRAM

Pag. 66-68

HIGHLIGHTED ACTIVITIES

Pag. 69-76

SMART CITIES, CHANGE THE WORLD

NOVEMBER 18th 9:30 – 10:30
ROOM A

SPEAKERS

Jerry MacArthur Hultin - Senior Presidential Fellow and President Emeritus - Polytechnic Institute of NYU - New York - USA

Anibal Gaviria - Mayor - City of Medellin - Medellin - Colombia

Antoni Vives - Deputy Mayor - Barcelona City Council - Barcelona - Spain

CHAIR

Mike Lake - President & CEO - Leading Cities - Boston - USA

KEYNOTE SESSIONS

THE FUTURE OF GLOBALIZATION

GO KN

NOVEMBER 19th 9:30 – 10:15
ROOM A

PARAG KHANNA

Global strategist, Best-selling author and Managing Partner
Hybrid Reality Institute - Singapore - Singapore

INTRODUCED BY

Mike Lake - President & CEO - Leading Cities - Boston - USA

IMAGING CITIES THAT CAN SAVE THE PLANET

SC KN

NOVEMBER 20th 16:15 – 17:00
ROOM A

ALEX STEFFEN

Planetary Futurist in Residence - IDEO, Design and Innovation
Company San Francisco - USA

INTRODUCED BY

Eugenie L Birch - Lawrence C. Nussdorf Professor of Urban Research and Education
Penn University - Philadelphia - USA

THE CREATIVE PROCESS IN CITIES

NOVEMBER 19th 17:15 – 18.00
ROOM A

KENGO KUMA

Professor - Tokyo University
Tokyo - Japan

DEYAN SUDJIC

Director - Design Museum
London - UK

CHAIR

Anatxu Zabaldeasoa - Journalist & author - El Pais - Madrid - Spain

SESSION SMART SOCIETY

Cities must foster creativity, innovation, economic development and collaboration. They must be an inclusive project for all citizens, bringing them to the center of decision-making in order to make urban and social development more democratic. Cities must be reinvented and transformed so that they become more sustainable, and improve quality of life and economic performance. This should be a shared vision and the way forward for citizens, public and private organizations and multi-stakeholders.

Information and inclusion are key assets for the future development of cities. Smartness is how cities take decisions, how cities use their resources, how inclusive and collaborative cities are and if there is technology there, it enables this and makes it better. Smartness is technology enabled but it is not technology driven or technology itself.

Plenary Session

IC TECHNOLOGIES FOR SOCIAL DEVELOPMENT **SS PL**

NOVEMBER 18th 18:00 – 19:15
ROOM A

Cities must foster creativity, innovation, economic development and collaboration. They must be an inclusive project for all their inhabitants, bringing them to the center of decision-making in order to make urban and social development more democratic. What are the means and methodologies that are being used nowadays to achieve this?

SPEAKERS

Claudio Orrego - Intendente Mayor - City of Santiago de Chile - Santiago de Chile - Chile
Margaret Newman - Executive Director - The Municipal Art Society of New York - New York - USA
Iemke Idsingh - Public Sector Solutions Director - Oracle - Utrecht Area - The Netherlands
Sean O'Brien - Global Vice President - SAP Urban Matters & Public Security - SAP - Andiran - France
Jerome Engel - Adjunct Professor Emeritus - Berkeley Research Group - San Rafael USA
Rui Moreira - Mayor - City of Porto - Oporto - Portugal

CHAIR

Nick Leon - Head of Service Design - London Royal College of Art - London - UK

Parallel Sessions

CIVIC ENGAGEMENT IN URBAN DEVELOPMENT

SS 01
NOVEMBER 18th 12:15 – 13:30

ROOM 3

In recent years, the participation of citizens in decision-making processes has become an important issue. Through bottom-up, collaborative and participatory urban development initiatives, these processes are starting to change. Nowadays, there are many projects being developed where the will of residents is playing a major role in the construction and management of the city.

SPEAKERS

Usman Haque - Founding partner - Umbrellium - London - UK

Martijn de Waal - Co-founder - The Mobile City - Amsterdam - The Netherlands

Peter Finnegan - Director Office of Economy & International Relations - Dublin City Council - Dublin - Ireland

Dan Getelman - Fellow - Code for America - San Francisco - USA

Flemming Borreskov - President - International Federation for Housing and Planning and Danish Architecture Center - Copenhagen - Denmark

MODERATOR

Manu Fernández - Founder - Human Scale City - Getxo - Spain

URBAN LABS BUILDING BETTER CITIES 1

SS 02
NOVEMBER 18th 15:00 – 16:15

ROOM 3

Nowadays architecture, urban planning, public policy, art, social and anthropological research, technology, innovation, economics and many other disciplines are combined to create a much more interdisciplinary approach to the study and the management of cities. Urban labs are one of the spaces where this experimentation is taking place, and they are being implemented already in many cities around the globe.

SPEAKERS

Frank Kresin - Research Director - Waag Society - Amsterdam - The Netherlands

Gabriella Gómez-Mont - Chief Creativity Officer - Laboratorio para la Ciudad - Mexico DF - Mexico

Lanfranco Marasso - Living Lab Manager - PugliaSmartLab - Lecce - Italy

Darko Radovic - Professor of Architecture and Urban Design - Keio University, Faculty of Science and Technology, Dept. of Systems Design Engineering - Tokyo - Japan

Martina Toffolo - Urban Planning Consultant - Pordenone City Council - Pordenone - Italy

Giuseppe Marinelli de Marco - Deputy Director - ISIA ROMA DESIGN - Rome - Italy

MODERATOR

Tomas Diez - FAB City, Director - IAAC - Barcelona - Spain

HABITAT III: ENGAGEMENT TOWARDS A NEW URBAN AGENDA

SS HA

NOVEMBER 18th 15:00 – 16:15
ROOM 2

In 2016 the United Nations will hold the Third Conference on Housing and Sustainable Development, Habitat III, to reinvigorate the global commitment to sustainable urbanization and to focus on the implementation of a “New Urban Agenda.” This session aims to present the Roadmap to participation for stakeholders from civil society, the private sector and other non-state actors, as well as to discuss the new agenda principles with UN-Habitat.

SPEAKERS

Eduardo López Moreno - Director of Research - UN Habitat - Nairobi - Kenya

Eugenie L Birch - Lawrence C. Nussdorf Professor of Urban Research and Education - Penn University - Philadelphia - USA

MODERATOR

Lola Huete - Periodista - El Pais - Madrid - Spain

CITIZENS AT THE CENTER OF CITY PLANNING

SS 03

NOVEMBER 18th 16:15 – 17:30
ROOM 3

How can cities plan and develop not only with its citizens in mind, but with them engaged and participating? This session will review some examples – and the results – of city development plans in which the exercise of radical democracy has been established as a priority.

SPEAKERS

Leonardo González Ross - Director of Planning and Finance - Calidad de Vida - Mexico City - Mexico

Maria Carolina Hoyos - Viceministra General - Ministerio de Tecnologías de la Información y la Comunicación - Bogotá - Colombia

Emanuela Donetti - inPACT Institute Director - Hepia, Haute Ecole Paysage, Ingenierie, Architecture - Geneva - Switzerland

José Manuel Corral - Intendente - Municipalidad de la Ciudad de Santa Fe de la Vera Cruz - Santa Fe - Argentina

Gloria Herance - Councilor, Public space, urban planning and sustainability - City of Hospitalet de Llobregat - Hospitalet de Llobregat - Spain

MODERATOR

Lluïsa Marsal-Llacuna - Director of the Official Master's Program in Smart Cities - University of Girona - Girona - Spain

FOSTERING SOCIAL DEVELOPMENT

SS 04

NOVEMBER 19th 14:15 – 15:30
ROOM 3

Cities are not only built environments; they are also made by and for people. People are the ultimate and most important part of cities. Policies and initiatives that implement social development – creating social care, social and human capital, community development, etc. – are, therefore, one of the main aims of smart cities.

SPEAKERS

Jagan Shah - Director professor - National Institute of Urban Affairs - New Delhi - India
Henriette Reker - Deputy Mayor and Head of the Department for Social Affairs, Integration and Environment - City of Cologne - Cologne - Germany
Maria Kiwanuka - Minister of Finance, Planning and Economic Development - Government of Uganda - Kampala - Uganda
Hana Hertsman - Managing Director - Holon Municipality - Holon - Israel
Ray Pinto - Senior Government Affairs Manager for Europe, Middle East and Africa - Microsoft - Brussels - Belgium

INNOVATION CITIES

SS 05

NOVEMBER 19th 15:30 – 16:45
ROOM 3

Many cities around the globe are implementing new urban proposals and strategies aimed at fostering the economy, the digital and the environmental sector with a holistic and interdisciplinary approach. This session will deal with those cities with urban strategies driven by innovation at the intersection of ICT, environmental sustainability and economic development.

SPEAKERS

Charlotte Palmer - Environment Strategy and Future City Manager - Peterborough City Council - Peterborough - UK
Steve Bowyer - Director of the Future Cities programme 'Peterborough DNA' and Chief Executive - Opportunity Peterborough - Peterborough - UK
Muammar Khaled Al Katheeri - Executive Vice President Engineering Management - Dubai Silicon Oasis Authority - Dubai - United Arab Emirates
Guido Arnone - Technologies & Digital Innovation Director - Expo Milano 2015 - Milan - Italy
Hila Oren - CEO - Tel Aviv Global - Tel Aviv - Israel

MODERATOR

Esteve Almirall Mezquita - Director of Center for Innovation in Cities - ESADE Business & Law School - Barcelona - Spain

SOLUTIONS FOR CITIZEN ENGAGEMENT & PARTICIPATION

SS LT

NOVEMBER 19th 15:00 – 16:15
ROOM 7

Information and communications technology (ICT) have become a very useful tool for fostering the engagement and participation of citizens in the processes of decision-making in cities. In this session, a series of lightning talks will highlight different projects that are being developed where new technologies have proven very effective.

SPEAKERS

Joan Mora i Bosch - Mayor of Mataró - City Council of Mataró - Mataró - Spain

Vladislav Kreinin - CEO - Yopolis - Moscow - Russia

Adrian Latorre di Leo - Solution Manager - Altran - Barcelona - Spain

Stefano Persi - Director - ENIDE - Barcelona - Spain

Francesc Sabaté i Domènech - Head of Deploying Smart Factories Area - FundacióCIM - Barcelona - Spain

Paul Todd - Green Flag Award Manager - Keep Britain Tidy - Wigan - UK

Itziar Aspuru - Market Manager in Urban Area - TECNALIA Resesarch&Innovation - Derio - Spain

Tom Cole-Hunter - Postdoctoral researcher - CREAL - Barcelona - Spain

Isabel Ochoa Soto - CUmapp - SODESTE - Madrid - Spain

Daniele Quercia - Research Scientist - Yahoo Labs - Barcelona - Spain

MODERATOR

Eduard Martin - Ajuntament de Barcelona - Barcelona - Spain

PARTICIPATION AND THE ROLE OF GREEN AND OPEN SPACE IN CITIES

SS 06

NOVEMBER 20th 11:15 – 12:30
ROOM 3

Cities are ecosystems of people, buildings, economies, and the green and blue spaces that provide social-ecological services such as water management; heat reduction; air cleaning; gardening; habitats for biodiversity; peacefulness, recreation, and beauty. This session is about engaging communities for the beneficial expression of nature in cities.

SPEAKERS

Jayne Engle - Curator - Cities for People - Montreal - Canada

Pranab Kishore Das - Principal Architect - PK Das & Associates - Mumbai - India

Eric Sanderson - Senior Conservation Ecologist - Wildlife Conservation Society - New York - USA

Ton Borsboom - Senior Director - Philips Design Lighting - Amsterdam - The Netherlands

MODERATOR

David Maddox - Founder / Editor - In Chief - The Nature of Cities - New York - USA

TOOLS AND INDICATORS FOR UNDERSTANDING CITIES

SS 07**NOVEMBER 20th 12:30 – 13:45**
ROOM 3

How can we study and analyze cities to better understand their trends and plan ahead? Many cities are using tools to measure changes in the environment, economic and social development, energy consumption and sustainability, creativity and technological development, and more. In this session we will review several initiatives that are working to better understand city development.

SPEAKERS

Alexei Novikov - President - Habidatum International, Inc. (USA) - Moscow - Russia

Chye Kiang Goh - Senior Systems Analyst - Urban Redevelopment Authority of Singapore (URA) - Nil - Singapore

Masoud Ghandehari - Associate Professor - Center for Urban Science and Progress, NYU Polytechnic School of Engineering - New York - USA

Art Eggleton - Chair - World Council on City Data - Ottawa - Canada

Patricia McCarney - President & CEO - World Council on City Data - Toronto - Canada

Boyd Cohen - Director of Innovation & Professor, Smart Cities - Universidad del Desarrollo - Santiago de Chile - Chile

MODERATOR

Ricart Joan Enric - Professor of Strategic Management - IESE Business School - Barcelona - Spain

The landscape for the energy sector is changing. Some of the concepts defining the future of energy are technology, flexibility, resilience, climate adaptation, financial model innovation, empowerment of people and business, and local level development. Energy companies are reinventing themselves from energy suppliers to service suppliers. They are concerned about environmental matters, clean energy technologies and resource scarcity issues.

Consumers are in a demanding shift, asking for a new energy model, environmentally and economically sustainable, making better use of local scale and renewable resources, while having a global focus and a strong partnership between governments and companies.

The marketplace for wind or solar energy is shifting and reaching the mainstream. Every industry is regulatory and subsidy dependent. Clean energy in short will be able to deliver to local stable energy and subsidies will decline over time, as many of the renewables are able to be paid by themselves.

Plenary Session

MAKING RENEWABLES PART OF A MORE EFFICIENT ENERGY MIX

EN PL

NOVEMBER 18th 10:30 – 11:45
ROOM A

This panel will be discussing the key elements that define the future of energy. What are the main challenges that we face to make renewables a main source in the energy mix? Is renewable energy a mature sector enough? Which initiatives are necessary to propel further energy efficiency in cities? What is the role of subsidies in this two-fold debate? Which technological challenges do we have ahead?

SPEAKERS

Donald Sadoway - John F. Elliott Professor of Materials Chemistry - Massachusetts Institute of Technology - Boston - USA

Michael J. Dixon - General Manager IBM's Global Smarter Cities Business - IBM - Armonk - USA

Joost van Keulen - Vice-Mayor & innovation, economic and international affairs representative - Groningen Municipal Council - Groningen - The Netherlands

Reinhold Achatz - Head of the Corporate Function Technology, Innovation and Sustainability - ThyssenKrupp AG - Cologne - Germany

CHAIR

Samuel Furfari - Professor of Energy geopolitics - Free University of Brussels - Brussels - Belgium

Parallel Sessions

RETHINKING CITIES TO IMPROVE ENERGY SUSTAINABILITY

EN 01

NOVEMBER 18th 12:15 – 13:30

ROOM 2

If we are to reduce emissions coming from heating, cooling and the power necessary to run our homes, we will need to rethink buildings and cities, and the way we are producing, storing and distributing urban energy. This session will look into new and different ways of approaching these issues, using different energy sources, technology and data.

SPEAKERS

Giovanni Vicentini - Town and energy planner - Province of Torino - Energy area - Torino - Italy

Jonathan Brookes - Smart City Project Manager - Bristol City Council - Bristol - UK

John Dulac - Energy Analyst from Energy Demand Technology Unit - IEA - Paris - France

Massimo Bertoncini - Director of European R&D Projects - Engineering Ingegneria Informatica - Roma - Italy

Leandro Madrazo - Professor - ARC Engineering and Architecture La Salle - Barcelona - Spain

MODERATOR

Manel Sanmartí - Manager of the Electrical Engineering Area - Catalonia Institute for Energy Research - Sant Adrià del Besòs - Spain

LARGE SCALE INTEGRATION OF RENEWABLE ENERGIES AND ENERGY EFFICIENCY IN CITIES

EN 02

NOVEMBER 18th 16:15 – 17:30

ROOM 2

Today's energy-related research questions are highly complex and can only be solved by taking an interdisciplinary, transnational approach. This session's key focus is on large-scale integration of renewable energies and energy efficiency at the city level. Co-organized with the European Energy Research Alliance (EERA).

SPEAKERS

Annemie Wyckmans - Associate Professor - Norwegian University of Science and Technology - Trondheim - Norway

Bernd Vogl - Head of Energy Planning - Vienna City Administration, Department for Energy Planning - Vienna - Austria

Hans-Martin Neumann - Research Engineer - AIT Austrian Institute of Technology - Vienna - Austria

Kevin Fitzgibbon - Nimbus Centre - Cork Institute of Technology - Cork - Ireland

CHAIR

Pablo Dolado - Researcher - Aragon Inst. of Engineering Research, I3a University of Zaragoza - Spain

SMART ENERGY FOR OUR CITIES

EN 03

NOVEMBER 19th 14:15 – 15:30
ROOM 2

In 2050, how will we acquire the energy power necessary to run our cities? Strategies already being implemented look to the efficient use of renewables, new technologies for storing and distributing energy, massive use of data, reducing energy needs and increasing energy efficiency. This session will review some of these approaches.

SPEAKERS

Kia Andreasson - Deputy Mayor - Responsible for Environment, Climate, Public Health and Consumer Issues - City of Gothenburg - Gothenburg - Sweden

Shoji Takenaka - VP, Chief Fellow - Toshiba - Yokohama - Japan

Norihiko Nomura - Executive Director for Climate Change Policy Headquarters - City of Yokohama - Yokohama - Japan

Macon Cowles - City Council Member - Boulder City Council - Boulder - USA

Margaret Groff - Chief Financial Officer (CFO) - ITAIPU Binacional - Foz do Iguaçu - Brazil

Alistair Pim - VP Smart Cities Business Development & Alliances - Schneider Electric - Andover - USA

MODERATOR

Eddie Bet Hazavdi - Director of Energy Conservation and Smart Cities - Ministry of Infrastructures Energy and Water - Jerusalem - Israel

REINVENTING THE ENERGY MARKET

EN 04

NOVEMBER 20th 11:15 – 12:30
ROOM 2

The transition to a new energy scenario will entail not only the development of technologies but also their commercial availability and deployment. Technology innovations can struggle to reach maturity because of a lack of subsidies, regulatory frameworks or business models able to help them develop. Constraints, successful cases and learning from past experiences will be reviewed.

SPEAKERS

Jean-Marie Bemtgen - Policy Officer - European Commission Energy Directorate - Brussels - Belgium

Isabel Pinto Seppä - Research Team leader - VTT - Espoo - Finland

Jeroen Westendorp - Economic Policy Advisor Energy & ICT - Groningen Municipal Council - Groningen - The Netherlands

Paula Kirk - Associate director of Group Leader, Cities, Energy and Climate Change Consulting - Arup - London - UK

Tim Pryce - Head of Public Sector - The Carbon Trust - London - UK

MODERATOR

Arnau Queralt - Director at Advisory Council for Sustainable Development - Generalitat de Catalunya - Barcelona - Spain

ELECTRIFYING URBAN MOBILITY

EN 05

NOVEMBER 20th 12:30 – 13:45
ROOM 2

The development of electric vehicles needs to overcome an established culture of petrol-fueled vehicles: charging infrastructures, new ways of understanding cars and mobility, the development of the car itself, business models and proper regulatory frameworks. All this needs to be adapted to make the electric vehicle work and reduce urban mobility emissions. Where do we stand and what are the major challenges to come?

SPEAKERS

Ramón Pruneda - Head of Energy and Mobility Projects in Strategic Sectors Department - Barcelona City Council - Barcelona - Spain

David Beeton - Director - Urban Foresight Limited - Newcastle upon Tyne - UK

Heike Barlag - Project Manager - Siemens AG - Nuremberg - Germany

MODERATOR

Arturo Pérez de Lucía - Director Gerente / Managing Director - AEDIVE - Madrid - Spain

SESSION TECHNOLOGY

We live in the age of information and communication technology. From the outset, cities are a technological system. A city without technology it is not a city. Today's "smartness" takes a step forward, including information technology, and making information as essential as roads, water or energy supply. This technological revolution is an opportunity of real change in how cities are operated and therefore a possible way forward for economic and social development. How should this new layer of "smartness" be added to the existing reality of cities? What are the management improvements that can be expected? What will the cost be? Why should cities be willing to become "smart"? How would this impact developing cities? What implications does it have in terms of its physical infrastructure? Should cities aim for a common technological vision from all city stakeholders and a shared technological infrastructure?

Real time data will become a new urban service like water or electricity and the correct usage of technology has to provide the necessary tools for the cities to be more organized, sustainable, inclusive, innovative and economically successful.

Plenary Session

INTEGRATING DATA AS AN URBAN SERVICE

TE PL**NOVEMBER 19th** 18:00 – 19:15**ROOM A**

We live in the age of information and communication technology. How should this new layer of "smartness" be added to the existing realities of cities? What are the management improvements that can be expected and at what cost? Why should cities be willing to become "smart"? What implications does it have in terms of physical infrastructure?

SPEAKERS

Dan Hill - Executive Director, Futures and Best Practices - Future Cities Catapult - London - UK**Carlo Ratti** - Director, MIT Senseable City Lab and Founding Partner, Carlo Ratti Associati - MIT Senseable City Lab and Carlo Ratti Associati - Turin - Italy**Albert Cuatrecasas** - Regional Business Manager - Abertis Telecom - Barcelona - Spain**Peter Quek Ser Hwee** - Chief Information Officer - Urban Redevelopment Authority - Singapore**Amr Salem** - Managing Director, Smart Cities, Internet of Things - Cisco - Dubai - United Arab Emirates

CHAIR

Manel Sanromà - CIO - Barcelona City Council - Barcelona - Spain

Parallel Sessions

NEW DEVELOPMENTS ON THE INTERNET OF THINGS

TE 01
NOVEMBER 18th 12:15 – 13:30

ROOM 1

The IoT market is evolving, and this means important changes in technology services requirements: new frameworks for IoT, further involvement of machine-to-machine communications, interoperability and management of short-range radio devices, as well as new billing models, among others. What implications does this have for cities and service providers?

SPEAKERS

Chaney Ho - President - Advantech Co. - Taipei - Taiwan

Jean-Louis Massaut - Director Solutions & IoT - Cisco Systems - Dubai - United Arab Emirates

Donald Clark - VP and Schneider Fellow - Schneider Electric - Amesbury Massachusetts - USA

Miguel Angel González Alemany - Chief Research Officer - Thyssenkrupp - Gijón - Spain

Carlos Yubero - Strategic Marketing Manager - Abertis Telecom - Madrid - Spain

MODERATOR

Svetlana Grant - GSMA - Director, Future IoT Networks - London - UK

GATHERING AND ANALYZING URBAN DATA

TE 02
NOVEMBER 18th 15:00 – 16:15

ROOM 1

This session will review innovative ways of analyzing life in cities through understanding the data they generate, the way in which citizens use ICT, the use of the Internet and the interaction of citizens through new technologies. We will discuss new ways to analyze and represent this information in order to better understand and plan future cities.

SPEAKERS

Karine Dognin-Sauze - Vice President for Innovation and New technologies - Grand Lyon - Lyon - France

Katya Serova - Vice-President - Habidatum International - New York - USA

Kevin Martin - Creative and Technical Services Manager - City of Portland Bureau of Planning & Sustainability - Portland - USA

David Trillo - CEO - Avansig - A Coruña - Spain

MODERATOR

Kevin Merritt - CEO, Founder - Socrata - Barcelona - Spain

THE INTERNET OF THINGS IN SMART CITIES

TE IOT

NOVEMBER 18th 15:00 – 16:15
ROOM 7

How the new developments on the Internet of things are changing our cities? And how Smart Cities are taking IoT into account? Which experiences can we highlight? This session will broadly consider how these 2 strategies are coming together.

SPEAKERS

Guy Danon - Industry Director, Local & Regional Government - SAP Europe, Middle East & Africa - Paris - France

BIG DATA MANAGEMENT

TE 03

NOVEMBER 18th 16:15 – 17:30
ROOM 1

As devices and ICT harvest more and more data each day, organizations face several major challenges. One is storing the information itself; another is navigating through these datasets to extract valuable information that can be acted on. This session will look at the most advanced techniques for storing, processing and efficiently managing big data.

SPEAKERS

Vincent Hauseux - Marketing & strategy director, protection systems - Thales - Paris - France

See-Kiong Ng - Programme Director - Institute for Infocomm Research - Singapore - Singapore

Dante Ricci - Senior Director, SAP Global Public Sector - SAP - Oakton - USA

Gary Wachowicz - Industry Managing Director - Microsoft - Redmond - USA

MODERATOR

José M. Baldasano - Full Professor of Earth Sciences - Polytechnic University of Catalonia - Barcelona - Spain

SOLUTIONS CONNECTING URBAN & DATA

TE LT

NOVEMBER 18th 16:15 – 17:30
ROOM 7

In this session we will review successful implementations and solutions connecting information with urban life, and social and urban services delivery. Through new electronic platforms, devices, and networks, citizens have more direct and easier access to services, while organizations and institutions have more facilities for managing them.

SPEAKERS

Joost Brinkman - Director Sustainability Services Benelux - ACCENTURE - Amsterdam - The Netherlands

Elena García - UVAX Concepts S.L. - Paterna - Spain

Albert Martí - Managing Director - AMB Associates - Barcelona - Spain

Katharina Wagner - Head of Business Development - car2go Europe GmbH - Leinfelden-Echterdingen - Germany

Luigi Telesca - COO @ CREATE-NET, Founder & CEO @ eXrade - SUPERHUB - Povo - Italy

Maria Luisa Catalan - Research Line Manager - I2CAT - Barcelona - Spain

Simon Delaere - Senior Researcher / project leader - iMinds - Brussels - Belgium

Ignasi Fontanals - CEO - OptiCits - Barcelona - Spain

Rafael Gimenez - Senior Researcher - BDigital Technology Center - Barcelona - Spain

Tarik Hammadou - CEO - VIMOC Technologies Inc - New Brighton - Australia

Jordi Badal Segura - CEO & Founder - Parkimeter Technologies S.L. - Barcelona - Spain

MODERATOR

Ignasi Bonet - Coordinador proyectos I+D+i - DGTSI - Generalitat Catalunya - Barcelona - Spain

CITY TO CITY COLLABORATION: SHARING KNOWLEDGE, CODE AND STANDARDS

TE 04

NOVEMBER 19th 14:15 – 15:30
ROOM 1

Pioneer cities are joining forces on data and API harmonization to enable scaling of smart city services. Connecting cities that value sharing their work with and borrowing best practices from other cities, the session is aimed at all those interested in creating a bigger market for services and a greater selection of solutions for smart citizens.

SPEAKERS

Dave Carter - Honorary Research Fellow - Chair, European Connected Smart Cities Network - Centre for Urban Policy Studies (CUPS) at the University of Manchester - Manchester - UK

Jaakko Salavuo - Head of Comms & IT - City of Helsinki - Helsinki - Finland

Ger Baron - Chief Technology Officer - City of Amsterdam - Amsterdam - The Netherlands

Bart Rosseau - E-Strategy and Eurocities Open Data Working Group - co-chair - City of Ghent - Ghent - Belgium

Tim Wisniewski - Director of civic technology - City of Philadelphia - Philadelphia - USA

MODERATOR

Hanna Niemi-Hugaerts - Development Manager - Forum Virium Helsinki - Helsinki - Finland

INTEGRATING ICT WITH URBAN SERVICES INFRASTRUCTURES

TE 05

NOVEMBER 19th 15:30 – 16:45
ROOM 1

Cities are, among other things, a compound of services and infrastructures, from social, health and educational services to utilities like gas, water or electricity. ICT are changing the way we manage all of these, as well as the actual services provided. Some of the changes we are facing include the integration of services, the development of city platforms and networks and the deployment of sensors. How is this integration happening?

SPEAKERS

Jessica Lappin - President of the Alliance for Downtown New York - Downtown Alliance - New York - USA

Ahmad Jaber - Head of Business Development - Logitek Middle East - Dubai - United Arab Emirates

Mirko Masi - Manager Mobile Communications - Abertis Telecom - Barcelona - Spain

Carles Rossinyol - Deputy chairman of the Department of Finance Office, Internal resources and New Technologies - Diputació de Barcelona - Barcelona - Spain

Francisco Bernardo - Product Development and Innovation Manager - Wellness Smart Cities and Solutions - Seville - Spain

MODERATOR

Miguel Raimilla - Executive Director - Telecentre.org Foundation - San Francisco - USA

CITY PROTOCOL: SENSING & SEEING A CITY'S ANATOMY

TE CP

NOVEMBER 19th 15:30 – 16:45
ROOM ----

City Protocol seeks to create the Internet of Cities through the development of an interoperable platform, which supports shared practice and heightened performance for cities. Core to this is the ability to sense and see a city's anatomy, a system of systems, enabling enhanced governance, evaluation and transformation of cities. We will explore the benefits and technologies of sensing and seeing, and City Protocol's approach contribution.

SPEAKERS

Michael Jansen - CEO - Cityzenith - Chicago - USA

Albert Isern - CEO - Bismart - Barcelona - Spain

Dave Welsh - Corporate Standards, CityNext - Microsoft - Seattle - USA

Hardik Bhatt - Managing Director - Cisco - Chicago - USA

Jordi Cirera - Project Manager - Institut Municipal d'Informàtica - Ajuntament de Barcelona - Barcelona - Spain

MODERATOR

Frans-Anton Vermast - Senior Strategy Advisor for Low Carbon and Connected Urban Planning - Amsterdam Smart City - Amsterdam - The Netherlands

DEVELOPING ICT-BASED CITY INITIATIVES

TE 06

NOVEMBER 20th 11:15 – 12:30
ROOM 1

Planning cities and districts with a strong ICT foundation has been a significant global trend with many different names, from innovation to digital to scientific cities. This session will review some of the urban developments that have put a central focus on ICT infrastructure or on making ICT a driver for their growth.

SPEAKERS

Rega Kakabas - Strategic developer for public sector - City of Stockholm's City Planning Administration - Stockholm - Sweden

Paul Doherty - President - The digit group, inc. - Collierville - USA

Rob Meikle - CIO - City of Toronto - Toronto - Canada

Vincenzo Maltese - Smart Society FET IP EU project Leader - University of Trento - Trento - Italy

Iemke Idsingh - Public Sector Solutions Director - Oracle - Utrecht Area - The Netherlands

TECHNOLOGIES FOR RESILIENT CITIES

TE 07

NOVEMBER 20th 12:30 – 13:45
ROOM 1

The concentration of population in high-density urban areas across the world makes the resolution and restoration of normal conditions a critical priority in cases of natural disasters, accidents or failures of infrastructures, and health or security emergencies. This session will explore how ICT are allowing cities to better foresee, mitigate and adapt to disruptive events with infrastructure and through social skills development.

SPEAKERS

Ahmad Faris Yahya - Managing Director - Cyberview Sdn Bhd - Putrajaya - Malaysia

Giampiero Nanni - Government and Public Affairs, EMEA - Symantec - Reading - UK

Sébastien Sabatier - Product Line Manager Citizen Security & Border Surveillance - Thales

Toshimasa Ikura - Senior Manager - Nippon Telegraph and Telephone West Corporation - Osaka - Japan

Mitsuhiro Kiriha - Senior Executive Councilor, Assistant to Chief Information Officer - Planning and Development Bureau, Kumamoto city, Japan - Kumamoto city - Japan

Guillaume Delmas - Director Smart Solutions Cofely INEO - GDF Suez - Paris - France

MODERATOR

Mary Keeling - Manager, Economic Analysis - IBM Smarter Cities - Dublin - Ireland

Climate change and the scarcity of oil resources are two of the main challenges confronting society nowadays. The current mobility patterns are still very much linked to both of them. Transportation is one of the main sources of CO2 emissions worldwide. Space wise, cars also put a challenge in the urban context, as cities have limited availability of public space to sort out everyone's mobility needs.

With this context, there is an urgent need to shift mobility towards electric, to make better use of all means of transportation, to integrate them, moving forward in the share of resources: vehicles, data, and infrastructures. New data driven technologies are helping to improve all means of transportation, with new solutions for reducing or avoiding congestion, improving parking management, integrating the different means of transport, public and private, individual and collective.

How can cities push further the integration of a complex supply side transport infrastructure? How can education play a more active role in promoting a rational use of transport means? How can cities find better ways to finance and operate transport infrastructures?

Plenary Session

CHANGING MINDSETS TOWARDS SUSTAINABLE MOBILITY

MO PL

NOVEMBER 20th 9:30 – 10:45
ROOM A

What is the future of mobility of our cities? Is technology going to provide solutions to sort out emissions, oil scarcity and the lack of space within cities to accommodate the use of cars? Is the future of urban mobility for the individual or the collective means, public or private? Is it for the motorized, the non-motorized or the e-mobility? How can we better integrate all means of transport within cities?

SPEAKERS

Morten Kabell - Technical and Environmental Mayor - City of Copenhagen - Copenhagen - Denmark

Enrique Peñalosa - Former Mayor - City of Bogota - Bogotá - Colombia

Richard De Cani - Director - Transport Strategy & Planning - Transport for London - London - UK

Ryan Chin - Managing Director & Research Scientist, City Science Initiative - MIT Media Lab - Cambridge - USA

Vladimiro Feliz - Former Deputy Mayor City of Porto - Head of Smart Cities Programs - CEIIA - Maia - Portugal

CHAIR

Alain Flausch - Secretary- General UITP - UITP Advancing Public Transport International Association - Brussels - Belgium

Parallel Sessions

INTEGRATING ALL MEANS OF URBAN TRANSPORTATION

MO 01

NOVEMBER 18th 12:15 - 13:30
ROOM 6

There is no one-size-fits-all solution for city transit; instead, the most effective approach is a balanced, diverse portfolio of options for a population with varying demands. What are the most effective cities doing to guarantee an integrated and efficient network of transit choices for their residents? What partnerships can be forged to best diagnose and address today's pressing transportation needs?

SPEAKERS

Abdulla Al Madani - CEO, Corporate Technical Support Services (CTSS) - Roads & Transport Authority (RTA) - Dubai - United Arab Emirates

John Nelson - Transport Studies Chair - University of Aberdeen - Aberdeen - UK

Adrià Gomila - Mobility Director - Barcelona City Council - Barcelona - Spain

Eric-Mark Huitema - Global Manager, WW Smarter Transport. Leader - IBM - Amsterdam - The Netherlands

MODERATOR

Jerome Pourbaix - Head of Policy & Outreach - UITP - Brussels - Belgium

URBAN MOBILITY INFRASTRUCTURES

MO 02

NOVEMBER 18th 15:00 - 16:15
ROOM 6

Through the understanding of cities' current mobility models and challenges, we will investigate how we need to develop our cities to facilitate the transition to a new mobility scenario. New roads and railway infrastructures, streets, public space and buildings - what is the right equation for combining these elements? Which infrastructures will need to be developed to make cities of the future move?

SPEAKERS

Andrew S. Lynn - Director, Planning & Regional Development - The Port Authority of New York & New Jersey - New York - USA

Ajoy Kumar Singh - Secretary to Govt., Urban Development Department - Government of Jharkhand - Ranchi - India

Alfonso Bataller - Mayor - Castelló de la Plana - Spain - Castellón

Alexander Pfurr - CEO - ThyssenKrupp Access Solutions GmbH - Essen - Germany

José Antonio López Becerra - Technology & systems director - SABA - City - Country

MODERATOR

Ariella Cohen - Executive Editor - Next City - Philadelphia - USA

SUSTAINABLE URBAN MOBILITY POLICIES

MO 03**NOVEMBER 18th** 16:15 – 17:30**ROOM 6**

As global population growth becomes increasingly an urban phenomenon, how can cities upgrade and expand transportation networks to reduce, rather than intensify, their environmental footprint? Which strategies can best strike the balance between public and private modes of transit? This session will highlight policies that are putting a cutting-edge approach to transportation systems at the center of sustainability efforts.

SPEAKERS

Cristian Bowen - Subsecretario transportes - Gobierno de Chile - Santiago de Chile - Chile

Stefan Atchia - Principal transport policies Specialist - African Development Bank - Abidjan - Ivory Coast

Markus Becker - Advisor - Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety of Germany - Berlin - Germany

Simone Bosetti - Integrated Planning - CIVITAS Initiative - Milan - Italy

Axel Volker - Research and Innovative Transport Systems, Directorate General for Mobility and Transport - European Commission - Brussels - Belgium

MODERATOR

Jaime Moreno - Vice Director of Mobility Management - DGT, Traffic General Directorate - Madrid - Spain

ITS FOR URBAN MOBILITY

MO 04**NOVEMBER 19th** 14:15 – 15:30**ROOM 6**

Many cities are using pools of data and arrays of sensors to monitor and manage transportation assets and traffic patterns, while also putting the information directly in the hands of their residents. This session will examine the proliferation of tools being used to capitalize on this trend. What is the role of data in improving the ability of cities to optimize – and citizens to access and choose between – multiple transportation options?

SPEAKERS

Jan Reitsma - Director - Sensor City foundation - Assen - The Netherlands

Gilles Vesco - Urban Mobility - Grand Lyon - Lyon - France

Vincenzo Marano - Research Associate - University of Salerno - Fisciano - Italy

André Dias - Head of Intelligent Systems - CEIIA - Porto - Portugal

Kiva Allgood - Global Market Development Director - Qualcomm - San Diego - USA

MODERATOR

Jaume Barceló - inLab.FIB - UPC - Barcelona - Spain

SELF-DRIVING COOPERATIVE URBAN VEHICLES

MO 05

NOVEMBER 20th 11:15 – 12:30
ROOM 6

Self-driving vehicles are moving closer to being a given on city streets, tantalizing potential for a cooperative network of self-driving cars, buses and trucks that will improve transportation, congestion and emissions. What has to be modified in the street infrastructure and traffic regulations, and what are the challenges for the vehicle technology? This session will discuss these issues and how this new technology might transform our cities.

SPEAKERS

Ryan Chin - Managing Director & Research Scientist, City Science Initiative - MIT Media Lab - Cambridge - USA

Carlos Holguin - Project Manager - Centre for Transport and Logistics - University of Rome "La Sapienza" - Rome - Italy

Elettra Stradella - Professor in Comparative Public Law - University of Pisa - Pisa - Italy

Josep-Ramon Ferrer i Escoda - Director of Smart City & deputy CIO - Barcelona City Council - Barcelona - Spain

MODERATOR

Alberto Sanfeliu - Full Professor - ECHORD++ PCP in Urban Robotics - UPC - Barcelona - Spain

World population growth is taking place in cities which makes urban planning a key tool for sustainable development. We need innovative ways to improve cities and to solve issues concerning cities and their citizens, considering a holistic approach. Cities need to integrate geographical planning with architecture, information, communication, technology and networking in long term plans. Cities need to provide better services to citizens by integrating into the equation issues related to quality of life such as waste, energy, equality, sustainable transportation, and technology, among others.

The future of urbanization is dependent on not repeating the mistakes that have been made in the urbanization of existing developed cities. For instance, they need far more innovative and sustainable strategies connected to public transportation, density, traffic, employment, education, heritage, entertainment, diversity, and affordability of housing. Cities need significant investments, and therefore it is necessary to put in place an appropriate legal framework that includes external costs.

Plenary Session

PLANNING CHALLENGES FOR RESILIENT AND EQUITABLE CITIES

SC PL**NOVEMBER 20th 15:00 – 16:15****ROOM A**

Climate change and world urban population growth is taking the challenge of planning cities to a new level to deliver better places to live. What are the key elements that should be part of the equation? Are we able to cope with population growth through proper city planning and development? How will we raise the resources needed to develop more equitable cities? And how will the infrastructures be paid for to improve a city's resilience?

SPEAKERS

James Goodman - Director of Futures - Forum for the Future - London - UK

Ibrahim Muhanna - Chairman - The Muhanna Foundation - Beirut - Lebanon

Sebastião Melo - Deputy Mayor - Porto Alegre City Hall - Porto Alegre - Brazil

Cristina Tajani - Councillor for Labour Policies, Economic Development, University and Research Innovation and Smart Cities - Municipality of Milan - Milan - Italy

Valentine Agid - Durudaud - Position - GDF Suez - Paris - France

CHAIR

Eugenie L Birch - Lawrence C. Nussdorf Professor of Urban Research and Education - Penn University - Philadelphia - USA

Parallel Sessions

PLANNING CITIES FOR URBAN GROWTH

SC 01
NOVEMBER 18th 12:15 – 13:30

ROOM 4

We face today an unprecedented population growth, which is taking place mainly in cities. It is key for future global sustainability that we study in depth the socio-economic trends and environmental challenges cities are facing, and carefully choose the urban development strategies to envision and plan the cities of the future. This session will look into how cities from different socio-economic circumstances are coping with these challenges.

SPEAKERS

José Torre - Citizen Centered Urbanism - Monterrey Institute of Technology and Higher Education - Garza García, Nuevo Leon - Mexico

Samuel Mabala-Shbuta - Commissioner for urban development - Ministry of lands, housing and urban development of Uganda - Kampala - Uganda

Yan Jing Wang - Vice general Manager - CCIAITAB (Internet of Things Application Branch, China Communications Industry Association) - Beijing - China

Juantxo Guibelalde - Partner everismart social business - Everis - Madrid - Spain

MODERATOR

Carlos Moreno - Professor - Scientific Committee of the High Council for Strategic Education and Research (CSFRS) - Paris - France

PLANNING SUSTAINABLE CITIES

SC 02
NOVEMBER 18th 15:00 – 16:15

ROOM 4

As early as the mid-20th century, there was heightened awareness about the use and deployment of natural resources and the consequences of those actions for the environment. Today, the energy crisis, climate change and severe atmospheric events are a widespread concern. This session will review the models applied, the results gathered, and the roadmap to continue down the path of building more sustainable cities.

SPEAKERS

Taichi Goto - Director General - Fukuoka Directive Council - Fukuoka - Japan

Wafa Al-Hameedi - CTO and the Head of IT and Smart City - Emaar, The Economic City - Riyadh - Saudi Arabia

Andreas Trisko - Head of the Urban Planning and Transport Planning department of the city of Vienna - City of Vienna - Vienna - Austria

Johnny Wong - Group Director (Building Research Institute) - Housing & Development Board (Singapore) - Singapore - Singapore

Steffen Braun - Head of "Urban Systems Engineering" - Fraunhofer IAO - Stuttgart - Germany

MODERATOR

Cristiana Fragola - Regional Director, Europe - C40 - Milan - Italy

CHALLENGES FOR FUTURE CITIES

SC 03
NOVEMBER 18th 16:15 – 17:30

ROOM A

What are the approaches taken by cities around the world to overcome the 21st century urban development challenges of socio- economic and environment sustainability? Looking at cities in different continents, what is the main problem for each to solve, and where are they focusing their efforts?

SPEAKERS

Rob Van Gijzel - Mayor - Municipality of Eindhoven - Eindhoven - The Netherlands

Apiwat Ratanawaraha - Professor of Urban Planning - University of Chulalongkorn - Bangkok - Thailand

Juan Camilo Quintero - Executive Director - Corporación Ruta N Medellín - Medellín - Colombia

Nir Barkat - Mayor - Municipality of Jerusalem - Jerusalem - Israel

David Howard - City Council member - Charlotte Municipality - Charlotte - USA

MODERATOR

Lluís Domènech - Director of Architecture - Barcelona Sagrera Alta Velocitat - Barcelona - Spain

LIVEABLE EQUITABLE CITIES

SC 04
NOVEMBER 19th 14:15 – 15:30

ROOM 4

This session will examine cities developed at human scale and trying to reduce the gap between rich and poor. What do cities need to be more liveable? What social and policy priorities can cities pursue to produce a fairer and more environmentally-conscious place to live? We will undertake a review of successful strategies that have been implemented, and their primary challenges encountered.

SPEAKERS

Bilal Hamad - Mayor - Municipality of Beirut - Beirut - Lebanon

Dian Tri Irawaty - Researcher and program manager - Rujak Center for Urban Studies - Jakarta - Indonesia

Victoria Okoye - Senior Communications Specialist - USAID/West Africa's Trade Hub & African Partners Network - Accra - Ghana

Jorge Pérez Jaramillo - Planning Director - City of Medellín - Medellín - Colombia

Tim Howland - Big Belly Solar - Newton - USA

MODERATOR

Sunil Dubey - Advisor - Metropolis World Association - Sydney - Australia

MIX USE STRATEGIES FOR FUTURE CITIES

SC MU
NOVEMBER 19th 14:15 – 15:30

ROOM 7

Mixed-use zoning is central to smart growth strategies for developing balanced, prosperous, and sustainable communities. How are policy-makers and their partners using this tool to re-shape cities in response to emerging urban trends? This session will consider Barcelona and New York City as two case studies for a mixed-use framework for planning and growth.

SPEAKERS

Alicia Glen - Deputy Mayor - City of New York - New York - USA

Antoni Vives - Deputy Mayor - Barcelona City Council - Barcelona - Spain

Kyle Kimball - President - New York City Economic Development Corporation - New York - USA

Vicente Guallart - Chief Architect - Barcelona City Council - Barcelona - Spain

Vishaan P Chakrabarti - Principal - SHoP Architects - New York - USA

CHAIR

Jerry MacArthur Hultin - Senior Presidential Fellow and President Emeritus - Polytechnic Institute of NYU - New York - USA

STRATEGY MATTERS FOR CITY DEVELOPMENT

SC 05
NOVEMBER 19th 15:30 – 16:45

ROOM 4

Through the testimony of four different experiences from four leading world cities, we will discuss the importance of strategic planning in building 21st century cities. How do global cities organize their metropolitan strategy, and which are the main topics they address?

SPEAKERS

Thomas Wright - Executive Director - Regional Plan Association - New York - USA

Ravi Kant - Managing Director - Housing & Urban Development Corporation - New Delhi - India

Erling Fossen - CEO - Oslo Metropolitan Area - Oslo - Norway

Fernando Álvarez de Celis - Director General de Planeamiento del Ministerio de Desarrollo Urbano - Gobierno de la Ciudad de Buenos Aires - Buenos Aires - Argentina

Simon Giles - Digital Cities Lead - Accenture - London - UK

DIMENSIONS OF URBAN RESILIENCE

SC 06

NOVEMBER 20th 11:15 – 12:30
ROOM 4

How are cities analyzing their resilience challenges? Which measures are being taken to monitor and manage critical infrastructures? What do city leaders think about their city's capacity to cope with emergencies? How is this going to scale to the technical level in terms of funding, resources and capabilities? How can global networks create synergies, share experiences and support their members in achieving a greater resilience?

SPEAKERS

Michael Berkowitz - Managing Director - 100 Resilient Cities - New York - USA

Kaine Thompson - Chief of Staff - Wellington City Council - Wellington - New Zealand

Manuel Valdes - Manager of Infrastructure and Urban Coordination - Barcelona City Council - Barcelona - Spain

Douglas Ragan - Chief, Youth Unit - UN-HABITAT - Nairobi - Kenya

MODERATOR

Dan Lewis - Chief, Disaster and Post-Conflict Section - UN Habitat - Nairobi - Kenya

URBAN ENVIRONMENTAL TECHNOLOGY

SC 07

NOVEMBER 20th 12:30 – 13:45
ROOM 4

What are smart cities doing to improve the way in which they manage waste, reduce clean water consumption, improve water treatment, reduce emissions and reduce energy consumption? This session will review new developments and strategies that will help our cities to reduce their environmental impact.

SPEAKERS

Nora Galparsoro - Councillor for Infrastructures and Urban Services - City of Donostia - Donostia - Spain

Morten Riis - Business Development Manager - Grundfos Holding A/S - Bjerringbro - Denmark

Azouz Zoubeir - Architect - ZAA - architects - Montreal - Canada

Martino Tran - Senior Research Fellow in Energy & Environment - Oxford University Centre for Environment - Oxford - UK

MODERATOR

Antoni Falcon - Director - Materia Verda - Barcelona - Spain

SOLUTIONS FOR SUSTAINABLE CITIES

SC LT

NOVEMBER 20th 15:30 – 16:30

ROOM 7

Sustainability at work. This session will look into straightforward projects and solutions solving various environmental issues in our cities.

SPEAKERS

Arturo Marquina Abril - Project Manager - Solintel M&P, SL - Madrid - Spain

Sharelynn Moore - VP Corporate Marketing and Public Affairs - Itron, Inc. - Liberty Lake - USA

Josep Maria Salas - Chief Strategy Officer - ENERBYTE - Sant Cugat del Vallès - Spain

Sabine Flores - Project Leader - Metropolregion Hannover Braunschweig Göttingen Wolfsburg - Hannover - Germany

Sophie Demigneux - Arquitecta - Estudio de Urbanismo - Barcelona - Spain

Andres Jaadla - Director of education and development - Rakvere Smart House Competence Centre - Rakvere - Estonia

Salvador Rueda - Director of the Urban Ecology Agency - The Urban Ecology Agency of Barcelona / Agencia de Ecología Urbana de Barcelona - Barcelona - Spain

MODERATOR

Álvaro Nicolás - Consultant - Anteverti - Barcelona - Spain

SESSION GOVERNANCE

When thinking about cities' governance and technology, technology should not be the objective, but the enabler. Many challenges for improving life in cities lie within the political domain. Citizens are becoming more demanding while city resources are diminishing. To tackle this challenge, one of the key strategies is collaboration and partnership with citizenship, the private sector, NGOs, academia and other numerous stakeholders. Together they should find ways to build meaningful solutions for people and improve their real lives. Technology has to play a key role in achieving sustainable cities, economic growth, jobs and new forms of public private collaborations in order to provide better services to citizens.

Fostering innovation needs a new regulatory framework, and new financial models that allow a better combination of social, economic and environmental values; worldwide standards through which cities can be assessed and exchange experiences and developments; and open data schemes for the development of external networks of entrepreneurs and innovations. Governance, with the help of technology, will make cities smart.

Plenary Sessions

THE CHALLENGE OF OPEN GOVERNANCE AND INNOVATION

GO PL

NOVEMBER 19th 10:15 – 11:30
ROOM A

In governance terms, working towards the smart city concept means citizens participating more closely in government decisions, governments opening data, and cities integrating innovation. How are cities responding to these challenges, the challenge of developing better cities, improving citizens' quality of life and generating open and transparent organizations?

SPEAKERS

Kyle Kimball - President - New York City Economic Development Corporation - New York - USA

Anibal Gaviria - Mayor - City of Medellin - Medellin - Colombia

Rob Bernard - Chief Environmental and Cities Strategist - Microsoft Corporation - Seattle - USA

Mark Kleinman - Director, Economic and Business Policy - Greater London Authority - London - UK

Antoni Vives - Deputy Mayor - Barcelona City Council - Barcelona - Spain

Charbel Aoun - President, Smart Cities Segment - Schneider Electric - London - UK

CHAIR

Stephen Goldsmith - Director, Innovations in American Government program and Data-Smart city solutions - Harvard Kennedy School of Government - Cambridge - USA

SMART CITIES BALANCING ECONOMIC, SOCIAL AND ENVIRONMENTAL DEVELOPMENT

GO SC PL

NOVEMBER 19th 12:00 – 13:15
ROOM A

Governing a city in today's complex, interdependent world demands a pragmatic and flexible approach. How can decision-makers strike a balance between social programs, environmental realities, and the economic bottom line, or better yet, bring them into alignment? What role will smart cities play in defining the best path forward?

SPEAKERS

Venkaiah Naidu - Union Minister for Urban Development - Government of India - New Delhi - India

Iñigo de la Serna - Mayor, Spanish Smart Cities Network, Spanish Municipalities Federation - City of Santander - Spain

José Antonio Gali Fayad - Mayor - City of Puebla - Puebla - Mexico

Steve Leonard - Executive Deputy Chairman - Infocomm Development Authority - Singapore

Eduardo Navarro de Carvalho - Chief Commercial Digital Officer - Telefónica - Madrid - Spain

CHAIR

Jordi Puigneró - IT Society General Director - Generalitat de Catalunya - Barcelona - Spain

Parallel Session

IMPROVING CITY MANAGEMENT FOR BETTER SERVICE PROVISION

GO 01

NOVEMBER 18th 12:15 – 13:30
ROOM 5

Smart cities aim for a better and more efficient service provision that keeps a balance between social, environmental and economic sustainability. One of the main strategies that cities are exploring in this context is the reengineering of tools and procedures, integrating and coordinating the work of different departments across the administrative organization. This session will review examples of successful implementations.

SPEAKERS

Valto Loikkanen - Business adviser - Yrityshelsinki - Helsinki - Finland

Sylvie Spalmacin - Roma - Vice President, Smarter Cities, Europe - IBM - Paris - France

Mercè Rius Serra - Deputy president for environment - Diputació de Barcelona - Barcelona - Spain

Zhenguo Dong - Director - Website management center of Hebei people's government - Shijiazhuang City - China

Peter Jeavons - Senior Director, Specialist Applications - Oracle - Gloucester - UK

MODERATOR

María Serrano Basterra - Smart City Center of Excellence Director - Schneider Electric - Madrid - Spain

PARTNERSHIPS FOR URBAN DEVELOPMENT

GO 02

NOVEMBER 18th 15:00 – 16:15
ROOM 5

A city's development of both its infrastructure and organizational capacity is built on long-term relationships between all interacting urban stakeholders: from its citizens to the different levels of the administration, from the private sector to educational, health, or financial services. This session will look into these partnerships and the projects developed to Foster City's oftentimes complex and expensive needs.

SPEAKERS

Ellis J. Juan - General Coordinator Emerging and Sustainable Cities Initiative & Vice Presidency of Sectors and Knowledge - Inter-American Development Bank - Washington DC - USA

Josep Ayuso Raya - 1st Deputy Mayor, Sabadell City Council - Sabadell City Council - Sabadell - Spain

Tri Rismaharini - Mayor - Surabaya City Government - Surabaya - Indonesia

Jorge Macri - Mayor - Vicente Lopez City - Vicente Lopez - Argentina

Jingmin Huang - Senior Urban Development Specialist - Asian Development Bank - Manila - Philippines

MODERATOR

Rafael Pérez Colón - Senior Director, International Organization - Worldwide - Microsoft Corporation - Pozuelo de Alarcon - Spain

EXTERNAL NETWORKS TO FOSTER INNOVATION WITHIN CITIES

GO 03

NOVEMBER 18th 16:15 – 17:30
ROOM 5

Technology is rapidly evolving. Cities do not yet have a capable policy framework to contend with these changes. City external networks can facilitate real-time experimentation with emerging technologies that otherwise would be difficult to support through local city governance. In this session, we'll showcase how to leverage this innovation within cities.

SPEAKERS

Caroline Twigg - Head of Partnerships - Future Cities Catapult - London - UK

Arturo Muent-Kunigami - Senior ICT Policy Specialist - The World Bank - Washington - USA

Nikolaos Isaris - Deputy Head of Unit: Net Futures, Experimental Platforms - European Commission - Brussels - Belgium

Jarmo Eskelinen - CEO - Forum Virium Helsinki - Helsinki - Finland

MODERATOR

Katalin Gallyas - Open Innovation Policy Advisor - City of Amsterdam - Amsterdam - The Netherlands

RELAUNCHING ECONOMICALLY OUR CITIES

GO 04

NOVEMBER 19th 14:15 – 15:30
ROOM 5

As greater competition between urban areas for talent and resources puts an added emphasis on job creation and enhancing quality of life, it is important to examine those urban or regional strategies that focus on economic development. In this session we will review plans, initiatives and strategies aimed to foster economic development in cities, while enhancing social and environmental sustainability.

SPEAKERS

Xu Liu - Vice Director - Beijing Municipal Commission of Economy and Information Technology - Beijing - China

Luis Fernando Arboleda Gonzalez - President - Financiera del Desarrollo Territorial - FINDETER - Bogotá - Colombia

Jorge Eduardo Rojas Giraldo - Mayor - Municipality of Manizales - Manizales - Colombia

Jorge Muñoz Wells - Mayor - Municipalidad de Miraflores - Lima - Peru

Guy Barlow - Director of Industry Strategy & Responsible for Public Administration Strategy - Oracle - Scottsdale - USA

Harry Verhaar - Global Head of Public & Government Affairs - Philips Lighting - Riethoven - The Netherlands

MODERATOR

Giorgio Prister - President - Major Cities of Europe - Bremen - Germany

GROWING THE CITIES MARKET BY ENABLING COMMON SOLUTIONS

GO CM

NOVEMBER 18th 12:15 – 13:30
ROOM 7

This session will debate recommendations and actions to make "standards" relevant and useful to cities, while helping to align the various standards organizations. The aim is to connect the need for common integrated solutions to help markets grow, while addressing some pressing societal challenges. We will review different experiences and discuss with some of the stakeholders involved.

SPEAKERS

Eduardo López Moreno - Director of Research - UN Habitat - Nairobi - Kenya

Carlos Gadsden - Executive Secretary - International Foundation for the Development of Reliable Governments - México - Mexico

MODERATOR

Graham Colclough - Chair of ISO Strategic Advisory Gr on Smart Cities - UrbanDNA - London - UK

OPEN DATA INITIATIVES

GO 05

NOVEMBER 19th 15:30 – 16:45
ROOM 5

Open data is generating a new source of development as data sets previously not accessible to the general public become available. What are the benefits, opportunities and challenges associated with opening data? To what extent is creating new forms of accountability, improving governance, promoting innovation and fostering new forms of social participation? How can we balance open data's transparency opportunities against its privacy threats?

SPEAKERS

Jarmo Eskelinen - CEO - Forum Virium Helsinki - Helsinki - Finland

Jennifer Belissent - Principal Analyst - Forrester Research - Les Houches - France -

Gavin McArdle - Developer & Postdoctoral Researcher - National Centre for Geocomputation, National University of Ireland Maynooth - Maynooth - Ireland

Rob Kitchin - Professor - National University of Ireland Maynooth - Maynooth - Ireland

HIGHLIGHTED ACTIVITIES

CITISENSE

SMART CITY EXPO WORLD CONGRESS

THE WORLD BANK

As part of the **Smart City Expo World Congress**, the **World Bank** is organizing **CitiSense 2014 Conference** on November 16th and 17th, 2014 in Barcelona. CitiSense 2014 is focused on open innovation with specific stress on developing practical solutions based on smart technologies. The first CitiSense 2013 was organized with the goal of promoting “Innovation from within” at the eve of the Smart City Expo World Congress in 2013. This second edition will promote the ‘how to’ implement innovative approaches for urban management.

The objectives of **CitiSense** are to: (i) allow cities to connect and learn from each others’ experiences and global expertise; (ii) support peer-to-peer learning among various city stakeholders to promote the concept of cities’ transformation into hubs for innovation and prosperity; (iii) boost co- creative efforts to empower citizens; and (iv) leverage new and existing technological platforms to improve service delivery and urban management.

TOPICS for 2014

- **Makers for Productive Cities**
- **Internet of Everything / Internet of Things**
- **Institutional arrangements for innovation at the city level**
- **Regulation and incentives for innovation, including procurement for innovation**
- **Open data for Open Cities**
- **Funding open innovation for cities: from informal crowd-funding to incubating**

HIGHLIGHTED ACTIVITIES

CITY INNOVATION SUMMIT

In the **City Innovation Summit** the city will be analyzed as scenario of innovation in all its dimensions: how do the main city players relate to the ecosystem of citizens, government, businesses, and knowledge institutions and what is the performance of this interaction; the city as a talent hub, which allows new unexpected relationships to arise increasing the innovation potential; and the city itself, as a laboratory of planning, architecture, urban history, mobility infrastructures and connectivity to innovation.

The **City Innovation Summit** is where all perspectives of innovation converge: the **Social** and civic perspective, with experiences of social innovation and citizen's laboratories; the **Urban** dimension, with the city as an innovation platform; the **Government** and administration, looking at innovation within their bodies; and the **Economic** perspective, with the city leveraging openness and innovative companies.

The **City Innovation Summit** is a meeting space for experiences, concepts and tools to deploy innovative cities. An excellent complement to the well established benchmark meeting, the **Smart City Expo World Congress**.

HIGHLIGHTED ACTIVITIES

RURAL SMART GRIDS

Cities import energy, water, food, human capital, and export products, services, and large quantities of solid and all kind of waste. The natural environment is the sink and source for urban flows and so, it becomes impossible to separate city from its surrounding region, when conceiving a territory's sustainable development.

Moving towards a more sustainable energy model means integrating in the current energy grid, renewable, local and distributed energy generation, such as solar, wind, biomass or hydraulic. For this, we also need to consider the territory that supports the infrastructures in order to capture, transform, and transport energy.

The development of rural areas and their role and relationship with cities needs a meeting point to gather stakeholders to discuss energy priorities. The **Rural Smart Grids Congress is the meeting point for them to discuss their future.**

Aims of the meeting

- Secure energy supply
- Increase competitiveness of the domestic energy market
- Promote economic development in the supporting territories
- Improve sustainability, looking after biodiversity, water resources and landscape

The **Rural Smart Solutions** is the expo area that hosts innovative technology and service companies providing specialized solutions for rural areas: smart grids, energy efficiency and sustainability.

HIGHLIGHTED ACTIVITIES

CALL FOR SOLUTIONS

The **Smart City Plaza** will showcase some of the leading companies' most innovative solutions on a genuine plaza of over 1,200 m².

Aiming to widen the array of solutions to be featured, will also welcome for the first time proposals from all individuals and organizations.

The best and most innovative solutions related with the main tracks of the Smart City Expo World Congress will be selected via this

Call For Solutions.

Benefits for the winners:

- Showcase of their prototypes in the very center of the exhibition area.
- A 4m² space rental in the Innovation Area.
- Access to the Smart City B2B program.
- One conference pass for the whole event (see Terms and Conditions).

If you are an entrepreneur, a research center, a start-up or a small or medium sized business apply here: Call for Solutions.

HIGHLIGHTED ACTIVITIES

SMART CITY OPEN INNOVATION MARKETPLACE

In connection with the Smart City Expo World Congress will take place the Smart City Open Innovation Marketplace (**Smart City OIMP**) where major corporations will meet the best innovative Smart City's solutions, entrepreneurs and new ideas in different topics.

Major companies as INDRA, Microsoft, IBM, FCC and Clear Channel will be launching innovative challenges to the International Open Innovation Community looking for solutions and new ideas to solve them.

Are you an entrepreneur, spin-off, SMEs or technology centre? Can you provide an advanced technology or innovative solution useful to solve major companies' challenges? Do you want to meet them face to face?

Take advantage of this opportunity to showcase your work and register to the Smart City OIMP.

HIGHLIGHTED ACTIVITIES

SMART CITIES INVESTMENT FORUM

This 1st **Smart Cities Investment Forum** will be held on November 19th and will involve private investors and entrepreneurs interested in business opportunities in this sector.

Addressed to:

Investors interested in participating in smart city projects willing to invest EUR25,000 or more.

Entrepreneurs with a project related to smart cities, clean energy, energy efficiency and energy saving, energy storage, mobility, infrastructure, water treatment and waste, seeking funding from private investors of at least EUR50,000.

The Smart Cities Investment Forum will be co-organized by The Association of Architects in Catalonia, Barcelona Activa (Barcelona City Council) through the ACCELMED Project (MED Programme) and Fira Barcelona.

HIGHLIGHTED ACTIVITIES

BROKERAGE EVENTS

The first edition of the international matchmaking event focused on smart cities is organized by ACCIÓ, the business support agency of the Catalan Government, with the support of the **Enterprise Europe Network**.

The aim is to assist SMEs, start-ups, entrepreneurs, universities and research groups in finding international partners for product development, manufacturing and licensing agreements, **joint ventures** or other **types of partnership**.

Activity will focus on one-to-one **30-minute pre-scheduled meetings** where you can explore potential business and technological co-operation opportunities with companies from all over the world.

Deadlines:

- Until November 3rd: register and submit a cooperation profile with a description of your offer or request. Profiles are published online.
- October 20th - November 12th: participants select interesting cooperation profiles from the catalogue and request meetings, or if invited, one can accept/reject the meetings.
- November 19th and 20th: bilateral meetings take place at your chosen times at the Brokerage Event stand.

HIGHLIGHTED ACTIVITIES

WORLD SMART CITIES AWARDS

The fourth edition of **the World Smart Cities Awards** will be held in 2014.

This prize recognizes the most ambitious Smart City strategies, the most advanced projects and the most innovative initiatives around the world fostering the development of the Smart City concept.

In 2013 the Awards received more than **250 submissions** from **35 countries**, crowning Rio de Janeiro as the best Smart City of 2013. Rio de Janeiro has committed to a long-term project to turn the city into a smart reference in the southern hemisphere.

The Project Award went to Mori-no-Funabashi City, an innovative urban development project in Tokyo focused on new environmental technologies and promoting energy conservation among residents.

And finally, the Initiative Award went to Smart Citizen – Crowd-sensing Open Community, a platform for participation in which citizens share real-time data captured by any device or sensor.

This 2014 the World Smart City Awards will repeat their success with the same three competing categories: **City**, **Project** and **Innovative initiative**.
