RIGGING SERVICES

Product

Anchoring points from the ceiling of the Hall to the elements you wish to suspend: structure, lighting, screens, signage, inflatables, etc
From a pivotal point with steel cable to points with either manual or electric motor for elevation.

Benefits

The stand is visible from more areas of the venue.
It optimizes the booth space and easy access for visitors, eliminating ground support elements to the desired point.
On site technical support.

Guarantees and safety

The materials used comply with EU regulations.
Installations are carried out in accordance with the safety coefficients of each hall.
* The load of each rigging point cannot exceed 150 KG

Basic conditions for suspended structures

All the materials to be used must be approved under EU Regulations.
The number of anchoring points depends on the type of structure and the individual loadings of each hall.
It is mandatory to use an additional security cable.
The motor to the structure should always be vertical and must be used with slings that hug the structure and should be joined with a shackle joined to the motor.
All suspended elements need to be approved by the management of each exhibition

In some cases, the location of the stand can result in:

- Installation of an additional structures (also called pre-rigging), in order to make possible the installation of the hanging points, which will entail an extra charge.
- Technically it is not possible to install anchoring points.

The wooden elements that are to be hanged must be adequately fixed to an EU approved structure in order to ensure that the weight is adequately divided.
The approved structure will be the one fixed onto the anchoring points or elevating system. Depending on the type of structure and the weight capacities of each pavilion, the division of weights of the structure will be taken into account in order to determine the number and location of the anchoring points needed for suspension.

We recommend the use of fireproof C1 cloth ceilings and 40%-60% vent meshing, in order to ensure the proper functioning of smoke and fire detector systems. Also, these ceilings must be fixed onto an EU approved structural frame. .

For security reasons, exhibitors who require water or compressed air inside the halls must contract their installation through ServiFira.

Under no circumstances shall an exhibitor / decorator connect to Fira Barcelona's supplies.

Due to technical limitations, if you wish to use compressed air in Halls 3, 4, 5, 6 or 7 in Montjuïc

venue, please check with ServiFira in advance on (+34) 93 233 20 00

Note:

Rental of compressed air units

If you need a compressed air unit, contact ServiFira by calling (+34) 93 233 20 00 and ask for a quote, giving the volume you need in litres per minute.

To ask for sink and special sink connection installations during build up period, please go to the Customer Service HelpDesk.

Important note:

Under no circumstances will the exhibitor's machinery be connected by our technicians. Likewise, water or compressed air connectors will not be provided for connection.

We recommend to request a platform when contracting any of these services.

FREQUENTLY ASKED QUESTIONS

How do I know what kind of electrical panel I need?

You need to add up the total number of watts you need for your stand, including: lighting, machinery, computer equipment, audiovisual equipment, etc. If you have contracted a stand through ServiFira, you do not need to add the power consumption from lighting as the stand includes the lighting panel. If you will be exhibiting machinery, you need to consider whether it operates on a single-phase (230 V) or three-phase (400 V) system.

What are the connection periods?

- Daytime electrical panels : These panels are connected each day 1/2 hour before the event open and disconnected 1/2 hour after the closing time.
- 24-hour electrical panels: These panels supply power throughout the whole event, 24 hours a day, and are recommended if you have fridges or machinery that needs to be permanently connected.

If you contract a three-phase electrical panel with CBs, how many single-phase outlets will it have?

The number of CBs installed should always be in accordance with the following ratio:

Panel	Amps	N° CB
8 kW	16 A	3
15 kW	32 A	6
20 kW	40 A	9
30 kW	63 A	12

CB = Circuit Breaker

1 kW = 1000 Wattos

Remember that the socket cannot bear more electrical power than the power indicated in the CB.

When is it necessary to provide an ELECTRICAL PLAN when contracting an electrical panel?

If the total kilowatts contracted through electrical panels is more than 50 kW, it is compulsory to submit an electrical plan in accordance with the regulations of the Department of Industry of the Generalitat of Catalunya.

Electrical project is needed:

- For a switchboard superior to 50 kW
- For the sum of several switchboards (superior to 50 kW) in the same stand.

When do I pay for my electricity charges?

Payments for electricity must be made before the assembly starts, and will be invoiced together with the electrical panel.

VERY IMPORTANT INFORMATION

-The prices for renting electrical panels during the event includes their official certification, but not consumption costs or the cost of the electrical plan if you are using more than 50 kW on your stand.

-Under no circumstances exhibitor's machinery will be connected by our technicians. Likewise, electrical connectors are not supplied (cables, extensions, adaptors, etc.).

-Payment of industry taxes is mandatory as from the second electrical panel, or from the first electrical panel for events held at Fira de Barcelona venues but not organised by Fira Barcelona.

If you hire an electrical switchboard there is no need to fill in form A as the electrical consumption will be automatically invoiced.

FREQUENTLY ASKED QUESTIONS

When are the electrical panels connected?

The electrical panels for the event will be connected on the last two days of the exhibition build-up date and when the electricians/installers submit the inspection reports or electrical plans to the official electrician of Fira Barcelona responsible for Hall connections.

What are connection periods?

- **Daytime electrical panels:** these are connected each day 1/2 hour before the event opens and disconnected 1/2 hour after the closing time.
- **24-hour electrical panels :** these supply power throughout the whole event, 24 hours a day, and are recommended if you have fridges or machinery that needs to be permanently connected.

What should I do if I do not have an authorised electrician/installer?

If you do not have an electrician/installer authorised by the Department of Industry of the Generalitat of Catalunya, we recommend that you order an electrical panel using form A and ServiFira will take care of everything for you.

VERY IMPORTANT INFORMATION

- You do not have to fill in this information if you have ordered a switchboard through ServiFira.

PROCEDURE FOR OFFICIAL CERTIFICATION OF ELECTRICAL PANEL

- 1 - You must go to the Customer Services Department to get the electrical power authorisation form (to submit this, all outstanding invoices must have been paid by the exhibitor and/or assembly company).
- 2 - Submit the following information to the Department of Industry (ICICT):
 - Inspection Report and official electrical certification from the Fira Barcelona.
 - Single-line diagram of the panels installed.
 - Electrical Power Authorisation Form.
- 3 - When the Inspection Report has been stamped and the installation is complete, hand in the green copy to the Hall Services Manager's office with the socket number to which the electrical panel has been connected.

Código. 512037	From 151 - 300 kW	464,60€

Recommendation:

Get your electrician to order the electrical power you really need, given that the cost of electricity invoiced to you corresponds to the total kW accepted by your switchboard/s and not the kW per hour actually used.

PRODUCT DESCRIPTION

Cable will give you access to the internet with the bandwidth that you have purchased. Fira de Barcelona will install it in your booth where you indicate it. But for Fira to be able to install it exactly where you want it, we need you to send a floorplan to internet@firabarcelona.com, locating the cable inside it.

For service activation it is essential to fill the form of Wi-Fi policy from Fira de Barcelona and send properly filled to the address internet@firabarcelona.com, you can download the document on a link found within the product description of the on-line platform.

In case you need to share the line, you must hire a switch and / or cables.

TÉCNICAL DESCRIPTION

The speed connection is symmetrical, the addressing is private and is provided by DHCP. In case you need addressing with public IP, you must hire it separately.

Fira de Barcelona reserves the right to automatically disconnect from the network equipment / devices exhibitor for configuration problems, virus or any other cause, that can damage Fira's network.

The given range is a class C (up to 250 devices), the first 50 IP addresses are reserved for static use.

For any questions please contact the IT service of Fira de Barcelona at: internet@firabarcelona.com

Wi-Fi SERVICES and Wi- Fi/CABLE COMBINATED:

All our spaces are provided with facilities from ultimate generation network capable of distributing 1 Gbps anywhere in the enclosure at a permanent total bandwidth of 24 Gbps. In the other side, a modern installation of Wi-Fi last generation antennas (supporting the 802.11ac standard, with speeds up to 150 Mbps *) integrated into the cable network, provides coverage to all halls making it possible to fully meet the technological needs.

* Always depending on the device you are connecting.

GENERAL CONDITIONS FOR CONTRACTING:

For service activation it is essential to fill the form of Wi-Fi policy from Fira de Barcelona and send properly filled to the address internet@fira-barcelona.com, you can download the document on a link found within the product description of the on-line platform.

For any queries before the event, please contact by email to internet@firabarcelona.com and we will be happy to help.

The product offering is divided into three categories:

- OFFICE SOLUTION
- Wi-Fi USERS WITH SHARED BANDWIDTH.
- Wi-Fi USERS WITH RESERVED BANDWIDTH

For more information refer to the online catalog, you will find the description and technical details of all available products in these categories.

¡¡ATTENTION!!

The exhibitors WiFi services operate only in the 5 GHz frequency.

Please refer to the technical specifications of your device and make sure it is compatible. If this is not compatible, you will not be able to use the WiFi service.

For instructions to help you determine if your device supports, you can download a document that will also find within the description of any Wi-Fi product available on the online platform.

Assembly
Services

Order online visiting the Exhibition website or www.servifira.com

ASSEMBLY SERVICES

The company responsible for stand assembly must pay Fira Barcelona for the services detailed below before assembly commences:

- Cost of Fira Barcelona personnel necessary for the use of facilities (opening halls, manning technical services, operational organisation, office staff, etc...).
- Maintenance of halls for third-party use.
- Personnel needed for vehicle and pedestrian access to the venues.
- Hall layout for set-up of stands.
- Storage of stand material in common areas (aisles, outdoor avenues, etc.)
- Administration, verification and issue of working passes in line with Social Security regulations.
- Hall lighting during the assembly period.
- Use and maintenance of bathrooms by assembly staff.
- Preventive venue surveillance (control room, fire-fighting service).
- Manning of on-site medical facility.

These services will be invoiced in accordance with the rates shown below:

- Código. 500031. **Carpeting and / or Platform** / 2,19€/m²
- Código. 500032. **Modular Stand** / 5,01€/m²
- Código. 500033. **Design Stand** / 7,77€/m²

Remember that stands contracted through ServiFira include the above rates in their prices.

WASTE REMOVAL

Fira Barcelona informs you that all the stand builders or Exhibitors who build their own stands have to take care of the waste materials of their stands during the build-up period and make sure that the space assigned is left clean and empty at the end of the dismantling period.

If needed, the waste disposal can be ordered through the official cleaning supplier.

If any waste is left in your stand area after the dismantling period has finished, the building company or the Exhibitor company will pay for the waste disposal cost according with the official fees as well as removing any kind of waste and not leaving them in another space of the site every day during ASSEMBLY AND DISMANTLING PERIOD.

- Empty boxes storage: Pick up of empty boxes from stand and return after the fair. Valuable crates of more than 100 eur should be declared. Return to the stand will start 2 hours after the official show end and will finish latest at 8h. of the following day. Parcels of more than 100 eur will be delivered only at the customer order and presence. The lack of value declaration will avoid the Resa liability on robberies over 100 eur. Crates should be correctly stocked and packed for manipulation. At the contract time Resa will deliver to each customer Identity labels to be placed on each crate. Resa offers a packing team to condition the crates for manipulation to be invoiced separately.
- Transport and forwarding: Complement of precedent items for a total logistics. Could include customs and insurance.
- In the services without driver the customer assumes the responsibility of correct manipulation, being liable on the responsibility for bad use or negligence.
- Services per hours include machinery and drivers per hours. The customer should perform the task of forwarder or intermediate with transport companies. The customer is responsible of the correct orders given to the drivers and the stability of the load.

CALCULATION AND OFFSET OF CO₂ EMISSIONS

A PLEDGE AND AN ADDED VALUE FOR YOUR CORPORATE STAND

Description

What is offset?

It's a mechanism arising from the Kyoto protocol which allows total or partial offset of any activity's CO₂ emissions through projects involving energy efficiency and renewable energy in developing countries.

Why compensate?

Compensating a stand's CO₂ emissions gives your business notoriety and is an added value for your brand.

It positions your company thanks to its commitment to society and to the fight against climate change and sets it apart from other competitors.

Our projects use methodologies approved by the United Nations Framework Convention on Climate Change, have Gold Standard or Verified Carbon Standard certificates and are verified every year by third parties.

Publicise the pledge

Once offset has been made, **lavola** will provide two vinyls with the offset logo to display on the stand.

Stages in the carbon strategy

lavola provides a complete carbon management service with four distinct stages:
