EVENT MAP 2024

PREMIUM SPONSORSHIPS

GET MAXIMUM BRAND EXPOSURE

WELCOME SPONSOR ▶◼◐◑◒

Seize the spotlight to the maximum with a premier dual-edge opportunity

A COMBINED SPONSORSHIP FOR A UNIQUE BRAND AMPLIFICATION OPPORTUNITY

ENTRANCE SCREEN

360° CIRCULAR LED

WELCOME SPONSOR

Be the forefront ambassador to all attendees entering the event!

Your brand will take center stage at the events entrance with not one but **two captivating displays**—the spectacular transparent LED screen and the dynamic circular LED—ensuring a 360-degree visibility experience for all attendees.

Newly inaugurated this year, this façade LED screen is the largest of its kind in all of Barcelona, providing an exceptional brand awareness and amplification opportunity with its dominant size* and position.

Plus, your brand will benefit from online and onsite visibility assets, additional to the façade and entrance screens.

Click [here](#) for a quick example of both formats.

PRICE:

40,000

Exclusive Benefits:

- **Limited Slots:** 3 slots available. First come, First served.
- **Priority for Global Partners:** This is a package we extend preferentially to our Global Partners as a courtesy for their involvement.
- **Full-Screen Advertising:** The Entrance Screen' will be switched on 14 hours a day throughout all 3 days. Advertising airtime will rotate during peak show hours as well as throughout each day of the event. Visibility and reach pre-, during and post-event can be measured in PR reach and visitor views. Ads on circular LED: 10 seconds.

- **Dynamic Duo:** Combined with the main hall's circular LED for an unrivaled sponsorship experience. Ads on circular LED: 10 seconds.

ENTRANCE SCREEN CONSIDERATIONS

Content deadline

To ensure there is sufficient time for technical validating and testing, content is due no later than 10/10/2024.

Screen specifications

- Product: Muxwave “Holographic effect” LED wall
- Pixel pitch: 3.9MM
- Resolution: 4864 x 2609 pixel
- Screen Size: 19250 x 9937 mm
- Content formats: png, svg, mp4, custom real-time content*

Key elements to note

- Black colours show transparent on the Muxwave wall
- The Muxwave panels are applied from the inside to the glass façade of the venue entrance.
- The glass facade is structured into segments and consists of many individual glass surfaces.
- The image surface is divided by bars. Keep this in mind when placing fonts and logos.
- In the lower area of the image are the entrance doors (circled in red), which are not equipped with Muxwave LED. This creates a section on which no content can be displayed.

*Sponsors can collaborate with Fira Barcelona’s official suppliers to craft custom content. Service at additional cost.

360° CIRCULAR LED CONSIDERATIONS

Content deadline

To ensure there is sufficient time for technical validating and testing, content is due no later than 10/10/2024.

Screen specifications

Clicking on the following [link](#) will take you to the documentation and specifications for working with the content*, along with example videos.

*Sponsors can collaborate with Fira Barcelona's official suppliers to craft custom content. Service at additional cost.

360° Circular Led Welcome Sponsorship content won't be on display during the Awards Party

TOWARDS ZERO WASTE

TOWARDS ZERO WASTE

Prove your organization's contribution to a more sustainable future.

We're working towards creating efficient, inclusive and sustainable cities – so naturally, our events should lead by example.

Started back in 2016, **Towards Zero Waste** is a dedicated sustainability initiative, based on four main principles

- **Towards a paperless event:** Prioritizing the use of digital assets through out the venue.
- **Use of less materials,** plus reusing, removing single-use plastics, and reducing food leftovers.
- **Separate collection:** Recycling within all the event areas.
- **Compensation of CO2 emissions.**

Find out all our actions about the TZW initiative [HERE!](#)

CONNECTING URBAN ENVIRONMENTS WITH IOT AND DIGITAL TWINS

WEDNESDAY, DECEMBER 02, 2020

+  MY LIST SHARE

Author | [MIRIAM BERHANE RUSSOM](#)

As urbanization continues to take hold and cities face challenges to become more sustainable and livable, urban planning and operations strategies must adapt. The current pandemic has changed the way we live, accelerating cities' future vision as a necessity of the present and what it means to live in a connected and resilient urban environment. Now more than ever, public and private organizations are coming together to push transformative solutions and change the way we plan and operate infrastructure and urban environments for all.

Microsoft, along with its partner ecosystem, continues to be deeply engaged with cities and communities around the world by providing capabilities and solutions that span the intelligent cloud and edge, advancing of AI driven by ethical principles, and continuing commitment to trust and security. Earlier this year, [IDC MarketScape](#) recognized Microsoft as the leading worldwide IoT application platform for Smart Cities, highlighting its secure, mature, and capable Azure IoT, AI, and Digital Twins services. In addition to IDC, [Guidehouse Insights](#) also recognized Microsoft as the leader in its leaderboard for Smart Cities platform suppliers, highlighting Azure's ability to support a broad portfolio of smart city solutions using common platform technologies.

As cities continue to invest in connected solutions, a [study by ESI ThoughtLab on hyperconnected cities](#) shows that as solutions become more interlinked their return on investment (ROI) grows. To unlock their full economic, social, environmental, and business value, cities need to use digital technologies to transform and interconnect key areas of their ecosystem—from roads to cars, buildings to energy grids, citizens to government, and cities to cities. Microsoft's focus to deliver new technology innovations in IoT, AI and Digital Twins is enabling connected solution integration that drives breakthrough insights and experiences from planning to operations of urban environments and their infrastructure.

DIGITAL TWINS

The concept of a Digital Twin, a virtual representation of real-world entities that bring in data from a variety of sources, has entered the realm of smart cities and promises to enable city administrations and urban planners to make better decisions with the help of data integration and visualization from across the urban space. While urban planners have already been using 2D and 3D models and computer-aided design for years, the integration of real-time data from IoT devices, location, weather, traffic, people movement, and other sources has been a gamechanger for urban planning and operations.

Earlier this year, Microsoft announced an update to [Azure Digital Twins](#) platform which enables modeling and creating digital representations of connected environments like buildings, factories, farms, energy networks, railways, stadiums, and cities, then bring these entities to life with a live execution environment that integrates IoT and other data sources. To drive openness and interoperability, Azure Digital Twins comes with an open modeling language, [Digital Twins Definition Language \(DTDL\)](#), which provides flexibility, ease of use, and integration into the rest of the Azure platform. Furthermore, to enable urban experiences that are geospatially aware, [Azure Maps](#) provides several geospatial services including access to real-time traffic, public transit, and weather data.

Modeling these complex interactions and high-value intersections between people, places, and things is unlocking new opportunities, creating new efficiencies, and improving public and private spaces.

[Learn more](#) on how Microsoft and ecosystem of partners are enabling cities and urban environments with transformative solutions with IoT and Digital twins.
