THE NEXT GENERATION
OF CHEMISTRY SOLUTIONS
The upcoming 19th edition of Expoquimia has been designed in accordance with the demands of the new markets.

This one-of-a-kind event has made a name for itself in the chemistry sector by fostering commercial partnerships and encouraging transfer of knowledge.

Expoquimia is a platform that brings together science and industry to find innovative solutions for a wide range of areas that include the automotive industry, health, detergents, food and technology.
A NEW MODEL WITH THREE THEMATIC AXES

The chemistry industry is driving the world’s major technology breakthroughs. We have developed three themes to help you pinpoint the content that is most relevant to your industry, interests, and future perspective.

This core axis of the event is focused on bringing together and developing all the initiatives that the sector proposes so as to present the markets with real case solutions.

Revolutionary innovation for the market. A wealth of opportunities for science, industry and capital to forge new partnerships.

Lifeblood of the sector and the optimization of processes. Getting to grips with Industry 4.0 begins with identifying the parts of a business that are most vulnerable to the interruption caused by digitization followed by targeting those aspects that will most benefit from digital technologies.

Expoquimia provides the ideal framework in which institutions, government organizations, companies and scientists can work together to develop the products and processes for the future.
THE WAY FORWARD
CONTENT STRUCTURE

NEW PROCESS
Expoquimia BIO offers biotech companies a first-rate meeting place. Come and find new business opportunities with our partnering system.

NEW MATERIALS
Find out about, interact and experiment with new materials that will revolutionise the future of the sector.

SMART CHEMISTRY
SMART FUTURE
Innovative and sustainable solutions for the demands of modern-day society.

MEDITERRANEAN CONGRESS OF CHEMICAL ENGINEERING
Reporting on the latest research in biochemical engineering and nutrition.

SMART SURFACES
The latest smart surfaces and materials in the surface treatment sector looking for new applications and an optimisation of processes.

PLASTICS AND THE ENVIRONMENT
Find out what the plastics industry is doing to help the environment.

SUSTAINABLE MATERIALS
In the move towards greater sustainability more and more new materials are appearing in the plastics sector. Support us in our commitment to the environment.

EUROCAR CONGRESS
An international meeting with all the latest trends in the mobility sector: surface treatment, the development and application of new colours, special finishes and the most recent developments in application processes.

EUROUSURFAS
The International Surface Treatment Event

EQUIPLAST
The International Plastics and Rubber Event

EXPOQUIMIA
The International Chemistry Event
NEW AND IMPROVED FORMAT
AN INNOVATIVE PLATFORM

Expoquimia exhibition area
Showroom of cutting edge products and services in the chemistry sector.

Technology transfer area
The place to explore the most innovative ideas in chemistry.

Eurosurfas exhibition area
Exhibiting the newest technologies and most innovative products for surface treatment.

Circular economy area
Come here to exchange ideas about circular economy solutions for the chemistry industry.

Equiplast exhibition area
Dedicated to the newest technologies in the manufacture of plastic and rubber.

Digital transformation area
A space to help players in the chemistry ecosystem take their first steps towards digital transformation.

Side events rooms
We ensure a fully operating set-up for your parallel activities in synergy with the main events.
EXPOQUIMIA CHEMICAL UNIVERSE SECTORS

Expoquimia is the European meeting place for all those who thrive on the business of chemistry technologies.

- BASIC CHEMICALS INDUSTRY - RAW MATERIALS
- INTERMEDIATE PRODUCTS AND SERVICES
- PURE CHEMISTRY AND PHARMACHEMISTRY
- NEW MATERIALS
- BIOTECHNOLOGY
- ANALYTICAL INSTRUMENTATION - LABORATORY MATERIAL
- INDUSTRIAL GOODS AND ENGINEERING
- MEASURING AND CONTROL
- INSTRUMENTATION PUMPS AND VALVES
- TECHNOLOGIES AND MACHINERY FOR PRODUCTION PROCESSES
- LOGISTICS

- MAINTENANCE AND STORAGE
- ENVIRONMENTAL TECHNOLOGY
- UNIVERSITIES, RESEARCH, DEVELOPMENT AND INNOVATION
- TECHNOLOGY TRANSFER
- INDUSTRIAL AND OCCUPATIONAL SAFETY
- SOFTWARE
- COMPOSITECH (TECHNOLOGY AND INNOVATION IN COMPOSITES)
OUR VISITOR PROFILE

TRADE VISITORS FROM THE LEADING INDUSTRIES

- Farming
- Food and drink
- Automotive/aeronautics/astronautics
- Building
- Cosmetics
- Electronics
- Packaging and logistics
- Rubber manufacturing/rubber processing
- Pharmaceutical industry

VISITOR PROFILES

- Metal industry
- Petrochemical industry
- Chemical industry
- Engineering and consulting
- Mining
- Energy technology
- Medical technology/precision mechanics/optics
- Water treatment

AN EVENT THAT TARGETS THE PRIVATE SECTOR

- Management
- C-level
- Engineers
- Consultants
- Others

- Private companies
- Technology centres
- Universities
- International organisations
- Public administration
- Private investment

USER SECTORS:

- Automobile industry
- Petrol/gas
- Food/drinks
- Cosmetics
- Pharmaceutical industry
- Detergents
- Technology
- Health
REASONS TO PARTICIPATE

During this four-day event leading companies in the European industry will showcase the newest technologies and most innovative products.

INCREASE YOUR VISIBILITY
Participation in our event will give you great exposure and allow you to engage directly with your target audience.

FIND NEW PRODUCTS
Science is developing new materials and products to respond to the current global challenges. Don’t miss out!

LAUNCH NEW PRODUCTS
Our exhibitors use the conference as a platform to launch new products and services.

MEET NEW SUPPLIERS
The event is a hub for hundreds of companies and professionals offering solutions that can be applied to your business.

ENTER NEW MARKETS
Expand your global reach at an event that features representatives from +70 countries.

ESTABLISH COLLABORATIONS
Take advantage of the numerous opportunities the event offers to meet potential collaborators who can help you kickstart future projects.

GAIN MEDIA COVERAGE
Our conferences and tradeshows attract international media attention; use the event to gain visibility.

PARTNERING
Partner with another company for mutual benefit. In the current economic climate this business practice on the up and up.

GET YOURSELF UP-TO-DATE
The event offers multiple activities to help get you up-to-date with all the latest developments and in particular with themes related to digital transformation.

SPEAK TO THE RIGHT AUDIENCE
Our high-calibre speaker lineup attracts industry buyers with purchasing power.

MEET THE RIGHT PEOPLE
The perfect opportunity to make face-to-face contact with industry experts. You can also consolidate existing customer relationships by inviting key customers to the event.
NEW MATERIALS AND NEW PROCESSES

Materials science is developing new formats, forms and materials to respond to a world of constant change in which we must change in order to evolve. Come to Expoquimia to see some of the research, materials and products from this field.

**COMMITTED TO NEW MATERIALS**

The NEW MATERIALS area will make its debut this year at Expoquimia.

Technological advances in the field of materials science are key for new industries.

The countless possibilities will help us move towards a more sustainable and advanced future.

Technologies such as robotics, the Internet of Things and 3D printing among others, will play a major role in enabling pioneering proposals that will help humanity to evolve.

- An innovative container for food made with graphene which allows the product to be kept fresh and safe for longer.
- A new material that has revolutionized the world of lighting thanks to biotechnology, giving rise to a light bulb that works using proteins or DNA with fluorescent properties.
- A new printable elastic conductor with high conductivity, even when stretched more.
- A new material called vanadium dioxide whose thermal conductivity at room temperature is up to ten times smaller than expected.
- Silicon-chip based optomechanical crystals designed at nanoscale to confine photons and mechanical motion in a common physical volume which could change the future of telecommunications.
- Materials capable of turning water into gas. This breakthrough could accelerate the switchover from coal, oil and other fossil fuels to commercially viable solar fuels.

All of these and other cutting edge developments will be showcased in the New Materials area.

If you’re a pioneer shaping the future of production this is the place for you.
The SMART CHEMISTRY SMART FUTURE project aims to foster positive public perception of the chemistry industry by highlighting its role as a provider of solutions to the demands of society, as well as a source of wealth and employment.

A UNIQUE FORUM WITH THE STAKEHOLDERS

SMART CHEMISTRY SMART FUTURE is a unique meeting place for companies in, or related to, the chemical sector and all those institutions or people who have the power to promote the potential of the chemistry industry. This includes public authorities, the media, investors, universities and research centers, professionals and experts and social institutions.

As a corporate project of the Spanish chemistry industry, SMART CHEMISTRY SMART FUTURE also intends to promote the quality and reliability of the national sector as a way to attract potential investors.

The innovative solutions of the chemistry industry have made a significant contribution to the combat of climate change by helping other industries to reduce their carbon footprint. All of this is thanks to new and better products, more energy-efficient processes and resources based on digitalization.
Expoquimia BIO offers biotech companies and innovative industries a unique environment in which to fast-track their collaboration. Come on board and generate new business opportunities with our partnering system: make contact with the companies that can fulfil your needs, showcase and source the products and services that will transform production processes towards a more sustainable future.

What do we offer?

**EXHIBITION AREA**
Book your stand and increase your visibility in the sector.

**SEMINARS**
Discover the latest developments in the sector from internationally recognised experts.

With 20% annual growth, biotech is set to be a key technology powerhouse in the chemical sector. Expoquimia BIO is an associated event that provides a unique space for companies in the biotech sector and chemical, pharmaceutical, food, cosmetics, energy and textile industries, with the aim of bringing together innovative companies to generate new business opportunities.

The biotech companies and R&D institutions at Expoquimia BIO offer the latest developments in:
- Chemicals
- Food
- Health
- Cosmetics
- Textiles
- Waste management
- New materials
- Bioprocesses

Be a part of Expoquimia BIO and get to know the national and international experts who will be presenting the state-of-the-art technologies in this field.
THE PERFECT SETTING FOR ORGANISING YOUR OWN ACTIVITIES.

SIDE EVENTS

This year, in order to enrich the congress and seminars with more specific knowledge and innovative approaches, we are looking to introduce and interlink events with a view to new fields of application.

Three major events offer a wealth of different platforms, with a focus on generating debate on the main issues concerning the chemical industry.

**INSTRUMENTAL ANALYSIS SEMINARS**
The Instrumental Analysis Seminars are geared towards every professional in the sector, from the perspective of both fundamental and applied research for solving society’s challenges.

**MEDITERRANEAN CONGRESS OF CHEMICAL ENGINEERING**
This congress, given by international experts and aimed at every professional in the sector, will reveal the latest research in fields such as biochemical and food engineering as well as addressing other issues.

Discover a new way of visiting the trade show: routes designed especially for you.
WE LOVE CHEMISTRY GALA.
AN EXCLUSIVE NETWORKING EVENT

The We love chemistry Gala recognize the work, leadership and transformation that stand out in the chemistry industry. The event is a unique opportunity to interact at the highest level with the most influential personalities of the chemical industry.

INDUSTRY LEGALCY
We want to support chemistry sector by giving them acces to the most modern and advanced chemistry solutions and technologies that will help them to grow and gain competitive advantage.

TOP-LEVEL PROFESSIONALS
This Gala is an unparalleled opportunity to meet industry and technology leaders and engage with the best and start working together for a better future of the sector.

THE CHEMICAL ECOSYSTEM
A place to encourage interaction between all the chemistry key-players.

CHEMISTRY AWARDS
An opportunity to promote your solutions and grab the attention of the sector.

Awards categories:
• Innovative Solution
• Business Transformation Solution
• Sustainable solution
MAKE SURE EVERYONE KNOWS ABOUT YOU PARTICIPATION OPPORTUNITIES

Whether you want to promote your brand or your project, make sure everyone knows about you. There’s a place for everyone at Expoquimia.

Choose one of our participation options and make a bigger impact.

PARTICIPATION OPTIONS
Choose your option and participate as an exhibitor

GLOBAL PARTNER
Optimise your participation by playing a strategic role with industry leaders.
- Space from 100 m²
- Networking with top prescribers & decision makers
- Maximum visibility in the exhibition’s “Global” area
- Great brand recognition in featured components
- Key role in innovative activities
- Exclusive treatment for your customers

€ 22,500
Stand not included
VAT not included

EVENT PARTNER
Share your experiences with our community and develop relationships with decision-makers.
- Space from 33 m²
- Networking with decision makers
- High visibility in the exhibition’s “Event” area
- Brand recognition in featured components

€ 8,500
Stand not included
VAT not included

GROWING PACK
Turnkey package.
- Space form 16 to 32 m²
- Tailor-made participation
- Turnkey package: The easiest way to participate
- Space located in “Growing” Area

€ 22,500
Stand not included
VAT not included

EXHIBITION OPPORTUNITIES
Create your operating base and start making contacts with all the other participants. We have a wide range of stand options to meet your objectives and budget.

SPONSORSHIP OPPORTUNITIES
If you’re a leader in your sector and you want to partner with us and guarantee exposure during the event, the best location for your stand, high-level visibility and access to all the exclusive benefits and services of our network.

SIDE EVENTS
The perfect setting for organising your own side events and generating even greater synergies. With a highly functional configuration and minimal preparation, you can maximise your resources and your time.
